Outcome Based Evaluation:

Outcome-Based Evaluation Robert L. Schalock, 2013-03-09 This book is the product of 30 years of experience with program evaluation. During this time both service recipients and educational and social programs have experienced major cultural and political shifts in service delivery philosophy including a focus on quality mainstreaming deinstitutionalization, community inclusion and an emphasis on measurable outcomes. Recently stakeholders of these programs have demanded more than just the provision of service forcing program administrators to evaluate their programs effectiveness and efficiency. The era of accountability is here and my major goal in writing this book is to help current and future program administrators understand that they need to look beyond simply the provision of service. Indeed they need to be competent in outcome based evaluation which I define as a type of program evaluation that uses valued and objective person referenced outcomes to analyze a program's effectiveness, impact or benefit/cost. By design this book can be read from the perspective of a consumer or producer of outcome based evaluation. As a consumer the reader will be introduced to the various techniques used in outcome based evaluation and how to interpret data from outcome based evaluation analyses. As a producer the reader will be instructed in how to do outcome based evaluation analyses along with how to use and act on their results. For both the consumer and producer two questions should guide the use of outcome based evaluation. Outcome-Based Evaluation

Robert L. Schalock, 2005-12-17 Outcome based evaluation continues to play a central role in the larger field of policy analysis and speaks to the needs and interests of administrators, students, policymakers, funders, consumers and educators. In a thoroughgoing revision of the first edition of this classic text and reference published by Plenum in 1995 the author broadens the coverage from his previous emphasis on developmental disabilities to include other areas of human and social service delivery such as education, health, mental health, aging, substance abuse and corrections. Feasibility Analysis of the Transition to Outcomes-based Evaluation for OCJP Domestic Violence Treatment Projects Funded by Victims of Crime Act, 1997 **Outcome-based Program Development and Evaluation** Hedley G. Dimock, 2004 **Ten Steps to a Results-based Monitoring and Evaluation System** Jody Zall Kusek, Ray C. Rist, 2004 An effective state is essential to achieving socio economic and sustainable development. With the advent of globalization there are growing pressures on governments and organizations around the world to be more responsive to the demands of internal and external stakeholders for good governance, accountability and transparency, greater development effectiveness and delivery of tangible results. Governments, parliaments, citizens, the private sector, NGOs, civil society, international organizations and donors are among the stakeholders interested in better performance. As demands for greater accountability and real results have increased there is an attendant need for enhanced results based monitoring and evaluation of policies, programs and projects. This Handbook provides a comprehensive ten step model that will help guide development practitioners through the process of designing and building a results based monitoring and evaluation system. These steps begin with a OC Readiness Assessment, OCO and

take the practitioner through the design management and importantly the sustainability of such systems The Handbook describes each step in detail the tasks needed to complete each one and the tools available to help along the way
