Brian L. Ott,2007-07-23 Television is one of the most important socializing forces in contemporary culture This book is a cultural history of prime time television in America during the 1990s Examines changes that took place in programming such as the rapid adoption of cable the proliferation of content providers the development of niche marketing the introduction of high definition television the blurring of traditional genres and the creation of new formats like reality based programming Argues that television programmes of the 1990s afforded viewers a symbolic resource for negotiating the psychological challenges associated with the shift from the Industrial Age to the Information Age Explores the ways in which television provided viewers with tools for coming to terms with their fears about living in the fast paced increasingly diverse information laden society of the 90s **The Television Revolution** Maarten Dings,2007 Here Is Television Thomas H.

Hutchinson,2015-08-04 Excerpt from Here Is Television Your Window to the World The author of this book has helped to shape the beginnings of television the newest of the instruments available to those in the future who seek to inform the minds of men or to win their sympathy and understanding It takes imagination and daring to leave the security of a known medium to explore through trial and error with tools which are often anachronisms as soon as used a new medium which has a limited audience no traditions no certainties of technique It was in part this same imagination which led the author to teach what was perhaps the first University class in Television Programming Offered by the Washington Square Writing Center of New York University in the fall of 1940 this course has been conducted each semester since that time with the exception of a brief period during the war and this volume is an expansion of these lectures discussions and demonstrations It is of special interest that this book grows out of teaching and will be widely purchased and used as a textbook With television admittedly in its infancy as an industry and as an art form why it may be asked should we presume to teach the techniques of television programming The answer is that we have a tradition of demanding that our best doctors artists and scientists shall teach us who seek to follow in their steps Happily most creative people are genuinely interested in helping us to share whatever secrets of technique or knowledge they possess Moreover the wisest of them realize that teaching benefits both him who learns and him who teaches The task of communicating what one knows or has done is in itself clarifying We do not have knowledge in its fullest realization until we have attempted to express it to communicate it to others Thus it is fortunate that when we as students seek to benefit from what pioneers in any field have learned knowledge itself is perfected in the very process of teaching About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of
