*Scientific and Technical Aerospace Reports* ,1991      Burroughs Clearing House ,1973      *Dangerous Technologies*  
Brandaan Huigen,2025-11-10 *Dangerous Technologies* focuses on the prevalent theft of consumer electronics in post  
Apartheid South Africa Through a material culture perspective it explores why these objects have commonly been targeted  
by bandits and subsequently circulated through the criminal underground The author traces ethnographically how devices  
travel between various social spheres delving into the experiences of a range of individuals from diverse residents who fall  
victim to criminals to the bandits who steal electronics for money or drugs the African migrants who export consignments of  
stolen electronics to their home countries the envious residents who buy stolen electronics and finally the police attempting  
to grapple with the problem *Dangerous Technologies* suggests that electronics have widened digital divides between citizens  
resulting in underground circuits that seek to violently redistribute enviable electronics to low income residents who have  
not been able to formally participate in electronics consumption and use Due to porous borders the widespread theft and  
redistribution of electronics do not only stem from internal inequalities within South African society but also from broader  
disparities across the African continent The book furthers knowledge about how and why particularly modern electronics  
have precipitated violent property crime in democratic South Africa It is relevant to scholars of social and cultural  
anthropology particularly those with an interest in material culture digital anthropology and economic and political  
anthropology as well as criminologists      *Reports of Cases Decided in the Appellate Division of the Supreme Court, State of*
