**Hearings, Reports and Prints of the House Committee on Science and Astronautics** United States. Congress. House. Committee on Science and Astronautics,1964     **Finding Funding** Ernest W. Brewer,2001-01-24 The materials collected developed and compiled in this volume are mostly related to grant proposal development for education but the push for uniformity in grants among the various federal agencies means that the materials have wider application Some of the ideas and tips may be of general interest and value to a grantwriter some ideas about project management should benefit anyone operating a project The book is divided into three major parts and several additional supporting sections Part I discusses the planning and some of the major tools of the trade needed to get started in the grant project field and to use the Internet to access funding resources Part II covers some important steps in developing a successful grant application Part III discusses both closing out a project annually and the often difficult but realistic element of terminating the project at the end of external support This handbook includes problem definition analysis of need goals and objectives activities some management details timelines personnel budget reports evaluation and dissemination of results The work is about exploring writing implementing and terminating an idea as a strong proposal and as an operating project Appendixes include list abbreviations state points of contact and a glossary Contains 51 references DFR     **The Aesthetics of Scientific Experiments** Milena Ivanova,Alice Murphy,2023-06-16 The relationship between aesthetics and science has begun to generate substantial interest However for the most part the focus has been on the beauty of theories and other aspects of scientific practice have been neglected This book offers a novel perspective on aesthetics in experimentation via ten original essays from an interdisciplinary group comprised of philosophers historians of science and art and artists The collection provides an analysis of the concept of beauty in the evaluation of experiments What properties do practising experimenters value How have the aesthetic properties of scientific experiments changed over the years Secondly the volume looks at the role that aesthetic factors including negative values such as ugliness as well as experiences of the sublime and the profound play in the construction of an experiment and its reception Thirdly the chapters provide in depth historical case studies from the Royal Society which also allows for a study of the depiction of scientific experiment in artworks as well as contemporary examples from the Large Hadron Collider and cases of experiments designed by artificial intelligence Finally it offers an exploration of the commonalities between how we learn from experiments on the one hand and the cognitive value of artworks on the other The Aesthetics of Scientific Experiments will be of interest to researchers and advanced students working in philosophy and history of science philosophy and history of art as well as practising scientists and science communicators     **Science & Technology Review** ,2013     **English Mechanic and Mirror of Science and Art** ,1881     **English Mechanic and World of Science** ,1876     **Scientific and Technical Aerospace Reports** ,1968     A     **Dictionary of Science, Literature, and Art** William Thomas Brande,George William Cox,1872     **Industrial and**

**Technological Applications of Neutrons** M. Fontana,F. Rustichelli,Società italiana di fisica,1992 Owing to the construction of intense neutron sources and to the remarkable progress in acquisition and elaboration equipment neutron scattering techniques have been employed more and more not only in basic research but also in technological areas and for the solution of specific industrial problems This is shown by the saturation of neutron beam time available at the main European sources and by an analysis of the users distribution Furthermore the condensed matter scientific community uses neutron scattering much more often now as a reference method and as an irreplaceable complement to other already well established investigation techniques The aim of this Enrico Fermi course on which the book is based is to provide an up to date picture of the main results obtained or obtainable by means of neutron techniques in applied research Emphasis is placed on the information and help these techniques can offer in some major areas of condensed matter physics and materials science and to their possible developments in the near future The volume is basically organised in topical subjects for each one a brief introduction to the fundamentals is given followed by examples of the concrete or potential applications The first half deals mainly with applications of neutron scattering to materials science metallurgy magnetic materials superconductors while the second half mainly deals with polymers micellar fluids interfaces and liquid crystals    Scientific American ,1891    Boston Journal of Chemistry and Popular Science Review ,1878    Geothermal Energy Geothermal Resources Council.
