Otero, Summer L. Kaplan, L. Santiago Medina, C. Craig Blackmore, Kimberly E. Applegate, 2024-08-31 This book provides evidence based guidance for pediatric imaging to radiologists pediatricians and all subspecialists caring for children as well as policy advocates While the majority of pediatric radiology books concentrate on diagnosis this book highlights how imaging should be used in optimal care allowing comparisons between different modalities and addressing follow up complications and the issue of timing of imaging The primary objective of this book is to provide a summary of appropriate imaging use in terms of modality and timing based on the best available evidence The book therefore acts as a resource for optimized clinical care of children and effective decision making A secondary objective is to collate the evidence based practices that constitute quality care for children in the setting of value based imaging Radiologists are often in the position of helping clinicians decide when and how to image children with suspected diseases or confirmed diagnoses However traditional residency training has done little to fulfill the need for this up to date evidence knowledge Moreover in spite of furthering subspecialization of the field

the great majority of children's imaging and care occur outside of children's hospitals where clinicians and radiologists might need this type of general guidance for establishing best practices. The book is divided in two parts: non-diagnostic considerations such as evidence-based imaging safety value and the practice of radiology in low resource settings and a second larger clinical component divided in prenatal oncology, neurological, musculoskeletal, cardiothoracic and abdominal imaging. This new edition incorporates changes in practice and guidelines in the decade since the first edition was written with many new chapters in emerging topics including prenatal oncology and neurological imaging. This is an ideal guide for radiologists, pediatricians, policy advocates and all healthcare professionals caring for children. **Oxford Textbook of**

**Global Health of Women, Newborns, Children, and Adolescents** Delan Devakumar, Jennifer Hall, Zeshan Qureshi, Joy Lawn, 2019. The aim of this book is to provide a summary of the current concepts and challenges in global maternal and child health in a format that appeals to students of the subject, the general public and current practitioners in the field. It also provides study exercises that may inform tutors on undergraduate and postgraduate courses. *Our Shrinking Globe: Implications for Child Safety, An Issue of Pediatric Clinics of North America* Avinash Shetty, 2016-01-19. Pediatricians in the United States and around the World continue to face a myriad of global health threats affecting child and adolescent health including 1 infectious diseases of poverty e.g. human immunodeficiency virus, HIV, tuberculosis, malaria and neglected tropical diseases in low and middle income countries (LMIC) especially in sub-Saharan Africa; 2 emerging and reemerging infectious diseases such as Ebola; 3 rise of non-communicable diseases e.g. common mental disorders; 4 unintentional injuries and 5 environmental health hazards e.g. climate change. Despite the promising news about rapid declines in maternal and child mortality in the era of Millennium Development Goals (MDGs) which originated from the United Nations Millennium Declaration in 2000, only 20% and 7% of LMIC are currently on track to attain the maternal and child mortality targets. For example, 44% of deaths in children younger than 5 years occur in neonates. Besides discovery of life-saving interventions e.g. development of new and improved vaccines for maternal and child health, we also need to do a better job at bridging the knowledge implementation gap and increase the effectiveness of proven interventions. For example, despite the availability of effective vaccines to prevent pneumococcal pneumonia, rotavirus gastroenteritis and human papilloma virus-related diseases e.g. cervical cancer, use of these vaccines remain suboptimal in LMIC. We need to recognize that global health is also local public health. For example, improving access, equity and quality of care for orphans and vulnerable children, immigrant and newly arrived refugee children in the U.S. remains a challenge. Timely access to psychiatric care for children and adolescents with mental illness is a major concern. The explosion of new age technology such as the internet also poses a considerable risk to children and adolescents. Pediatricians also need to be aware of diverse socio-cultural determinants of health and ethical issues in global health service and delivery. This issue of *Pediatric Clinics of North America* aims to address the above crucial global health challenges affecting children and adolescents. As practicing pediatricians, we have the unique

opportunity to influence local and global public health In the post MDG era beyond 2015 collaborative partnerships between various disciplines and across research education and service is vital to reduce health inequities in children worldwide

**Pediatric Prevention, An Issue of Pediatric Clinics** Earnestine Willis,2015-09-07 Preventive pediatrics remains the foundation for pediatricians to offer benefits for future generations Social conditions often complicate health status and bureaucracies pose challenges for families and children to navigate service systems Therefore it is crucial to emphasize a host of topics that children and

families face in addition to highlighting opportunities for overcoming some of those challenges In this issue an array of authors will update pediatricians on the prevalence and management of chronic health and social conditions such as childhood poverty youth violence oral health asthma foster care toxin exposures including tobacco and childhood obesity Promising interventions that pediatricians should continue to examine include how pediatricians can advocate for breastfeeding as a wellness concept for working mothers in the workplace promotion of childhood literacy development maximizing immunization compliance monitor the impact of public policy such as the Affordable Care Act ACA on children s health and how community health workers CHWs can be vital to community health improvement Proposed interventions include a description of how the medical and legal partnership model can be an empowering strategy for families to address social determinants of health SDH when lawyers are included as a member of the health care team In addition pediatricians and all other child healthcare professionals must investigate epigenetic mechanisms that might predispose children to risk factors or good health outcomes

*Children and Youth in Limbo* Nadia E. Finkelstein, 1991-09-30 The American family structure is complicated and only becoming more so as time goes on Finkelstein attributes this complexity with its accompanying value confusions and inconsistencies to the voluntary and involuntary uprooted migrant immigrant multiethnic and multicultural origins of the country itself As people of different cultures intermarry the complexities surrounding communications and expectations increase dramatically with each ensuing generation These changes coupled with the pressures of a rapidly changing world place the American family and therefore American children in jeopardy This unique volume does not just examine the troubles that American families face or demand that changes be made Finkelstein approaches family problems from a direct practice perspective and speaks to the implementation of needed services The author designs an array of family focused programs emphasizing wellness strengths and assets She calls on communities as well as individual agencies to organize themselves to create services from the ordinary such as housing day care education and family counseling to the very special which includes outreach preventive services for families in trouble family foster care adoption and a variety of residential options for youths with severe problems Finkelstein stresses that these programs must be family centered they must be linked to past family connections and they must build connections into the future This work will offer students and scholars in social work child welfare and public policy a complete overview of the systemic difficulties of the American family as well as
