**Impact of Influencer Marketing on Young Women's Customer Experience on Cosmetic Products** Jule Prescher,2023-06-06 Bachelor Thesis from the year 2023 in the subject Communications Multimedia Internet New Technologies grade 1 3 University of applied sciences Cologne language English abstract This thesis aims to realize how influencer marketing performs and its impact on the Cx Therefore the research addresses the following questions How powerful are influencers these days What is different about influencer marketing and why is it a successful strategy How do people perceive information shared by influencers and which factors are decisive for potential customers to purchase products advertised by influencers What impact does an influencer have on the overall Cx The internet has been fully integrated into people's daily lives worldwide over the past years The percentage of the world's population with access to the internet has doubled from 32% in 2011 to 63% in 2021 90% of people from developed countries access the internet in 2021 At the same time the number of social network users is increasing These networks have the purpose of connecting with friends In 2022 5 billion

people have access to the internet worldwide and 4.7 billion people use social media. Ultimately 93% of those with internet access own at least one SM account that is more than half the population worldwide. Through time companies found new marketing strategies which reached active people on SM. These platforms are necessary to reach Generation Z people born in the late 1990s. They are different and cannot be reached in the same way as they watch Netflix instead of TV or listen to Spotify instead of the radio. For example, Influencer marketing became a 10 billion industry in 2020. Influencers share their lives on SM networks. Due to their high reach, they receive offers from companies for cooperation. Influencers' followers admire and trust their recommendations due to their personal and authentic representation. While advertising products, influencers show how to use them, where to buy them, and give their opinion. For higher sales, influencers often receive promo codes for a discount or free products for each order.

*Return On Influence: The Revolutionary Power of Klout, Social Scoring, and Influence Marketing* Mark Schaefer, 2012-03-07. *Streaming, Sharing, Stealing* Michael D. Smith, Rahul Telang, 2016-08-08. How big data is transforming the creative industries and how those industries can use lessons from Netflix, Amazon, and Apple to fight back. The authors explain gently yet firmly exactly how the internet threatens established ways and what can and cannot be done about it. Their book should be required for anyone who wishes to believe that nothing much has changed. The Wall Street Journal. Packed with examples from the nimble footed who reacted quickly to adapt their businesses to laggards who lost empires. Financial Times. Traditional network television programming has always followed the same script: executives approve a pilot order, a trial number of episodes, and broadcast them expecting viewers to watch a given show on their television sets at the same time every week. But then came Netflix's *House of Cards*. Netflix gauged the show's potential from data it had gathered about subscribers' preferences, ordered two seasons without seeing a pilot, and uploaded the first thirteen episodes all at once for viewers to watch whenever they wanted on the devices of their choice. In this book, Michael Smith and Rahul Telang, experts on entertainment analytics, show how the success of *House of Cards* upended the film and TV industries and how companies like Amazon and Apple are changing the rules in other entertainment industries, notably publishing and music. We're living through a period of unprecedented technological disruption in the entertainment industries. Just about everything is affected: pricing, production, distribution, piracy. Smith and Telang discuss niche products and the long tail, product differentiation, price discrimination, and incentives for users not to steal content. To survive and succeed, businesses have to adapt rapidly and creatively. Smith and Telang explain how companies can discover who their customers are, what they want, and how much they are willing to pay for it. Data. The entertainment industries must learn to play a little moneyball. The bottom line: follow the data.
