Geodynamics of the Indian Plate Neal Gupta, Sampat K. Tandon, 2020-02-28 This book provides insights on new geological tectonic and climatic developments in India through a time progression from the Archean to the Anthropocene that are captured via authoritative entries from experts in earth sciences This volume aims to bring graduate students and researchers up to date on the geodynamic evolution of the Indian Plate concepts that have so far resulted in a rather uneven treatment of the subject at different institutions The book is divided into 4 sections and includes perspectives such as the formation and evolution of the Indian crust in comparison to its neighbors such as Antarctica Africa and Australia the evolution of Precambrian cratons and sedimentary basins of India and a summary account of early life reported in the Indian stratigraphic record Readers will also discover the key recent research into the neotectonics tectonic geomorphology and paleoseismology of the Himalayan Front Researchers and students in geology earth sciences sedimentology paleobiology and geography will find this book appealing

Binary Decision Diagrams and Extensions for System Reliability Analysis Liudong Xing, Suprasad V. Amari, 2015-06-05 Recent advances in science and technology have made modern computing and engineering systems more powerful and sophisticated than ever The increasing complexity and scale imply that system reliability problems not only continue to be a challenge but also require more efficient models and solutions This is the first book systematically covering the state of the art binary decision diagrams and their extended models which can provide efficient and exact solutions to reliability analysis of large and complex systems The book provides both basic concepts and detailed algorithms for modelling and evaluating reliability of a wide range of complex systems such as multi state systems phased mission systems fault tolerant systems with imperfect fault coverage systems with common cause failures systems with disjoint failures and systems with functional dependent failures These types of systems abound in safety critical or mission critical applications such as aerospace circuits power systems medical systems telecommunication systems transmission systems traffic light systems data storage systems and etc The book provides both small scale illustrative examples and large scale benchmark examples to demonstrate broad applications and advantages of different decision diagrams based methods for complex system reliability analysis Other measures including component importance and failure

frequency are also covered A rich set of references is cited in the book providing helpful resources for readers to pursue further research and study of the topics The target audience of the book is reliability and safety engineers or researchers The book can serve as a textbook on system reliability analysis It can also serve as a tutorial and reference book on decision diagrams multi state systems phased mission systems and imperfect fault coverage models *International Journal of Electrical Engineering Education* ,1973

Male Sterility in Higher Plants Mohan L.H. Kaul,2012-12-06 Nature has something more in view than that its own proper males should fecundate each blossom Andrew Knight Philosophical Transactions 1799 Sterility implicating the male sex solely presents a paradoxical situation in which universality and uniqueness are harmoniously blended It maintains a built in outbreeding system but is not an isolating mechanism as male steriles the self emasculated plants outcross with their male fertile sibs normally Both genes nuclear and cytoplasmic and environment individually as well as conjointly induce male sterility the former being genetic and the latter nongenetic Genetic male sterility is controlled either exclusively by nuclear genes ms or by the complementary action of nuclear lr and cytoplasmic c genes The former is termed genic and the latter gene cytoplasmic male sterility Whereas genic male sterility exhibits Mendelian inheritance gene cytoplasmic male sterility is non Mendelian with specific transmissibility of the maternal cytoplasm type Genetic male sterility is documented in 617 species and species crosses comprising 320 species 162 genera and 43 families Of these genic male sterility occurs in 216 species and 17 species crosses and gene cytoplasmic male sterility in 16 species and 271 species crosses The Predominance of species exhibiting genic male sterility and of species crosses exhibiting gene cytoplasmic male sterility is due to the fact that for the male sterility expression in the former mutation of nuclear genes is required but in the latter mutations of both nuclear and cytoplasmic genes are necessary
