**I Think**

**Therefore I Eat** Martin Cohen, 2018-11-13 The worst thing about food science the elephant in the room is that it's not just the opinions that are changing but the facts themselves shift too Did you know that the great philosophers were the original foodies To eat or not to eat That's an easy question to answer But what to eat That's a deep and profoundly difficult one Doctors and nutritionists often disagree with each other while celebrities and scientists keep pitching us new recipes and special diets No one thought to ask the philosophers those rational souls devoted to truth ethics and reason what they think Until now **Forest Notes**, 1996 **Fast Forward** Les Brown, Savannah Waring Walker, 1983 **Seeing Nature Through Gender** Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions, desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans, animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet **Issues and Images** William E.

Rivers, 1993-02 **Geschichte Der Geschichtsschreibung**, 2005 **The Origins of Sociable Life: Evolution After Science Studies** Myra J. Hird, 2009-05-29 This ambitious book considers social scientific topics such as identity, community, sexual difference, self and ecology from a microbial perspective Harnessing research and evidence from earth systems science and microbiology and particularly focusing on symbiosis and symbiogenesis the book argues for the development of a microontology of life **Unprocessed** Megan Kimble, 2015-06-23 In the tradition of Michael Pollan's bestselling *In Defense of Food* comes this remarkable chronicle from a founding editor of *Edible Baja Arizona* of a young woman's year long journey

of eating only whole unprocessed foods intertwined with a journalistic exploration of what unprocessed really means why it matters and how to afford it In January of 2012 Megan Kimble was a twenty six year old living in a small apartment without even a garden plot to her name But she cared about where food came from how it was made and what it did to her body so she decided to go an entire year without eating processed foods Unprocessed is the narrative of Megan s extraordinary year in which she milled wheat extracted salt from the sea milked a goat slaughtered a sheep and more all while earning an income that fell well below the federal poverty line What makes a food processed As Megan would soon realize the answer to that question went far beyond cutting out snacks and sodas and became a fascinating journey through America s food system past and present She learned how wheat became white how fresh produce was globalized and animals industrialized But she also discovered that in daily life as she attempted to balance her project with a normal social life which included dating the question of what made a food processed was inextricably tied to gender and economy politics and money work and play Backed by extensive research and wide ranging interviews and including tips on how to ditch processed food and transition to a real food lifestyle Unprocessed offers provocative insights not only on the process of food but also the processes that shape our habits communities and day to day lives Modern Conspiracy Emma A. Jane,Chris Fleming,2014-08-28 While

conspiracy theory is often characterized in terms of the collapse of objectivity and Enlightenment reason Modern Conspiracy traces the important role of conspiracy in the formation of the modern world the scientific revolution social contract theory political sovereignty religious paranoia and mass communication media Rather than seeing the imminent death of Enlightenment reason and a regression to a new Dark Age in conspiratorial thinking Modern Conspiracy suggests that many characteristic features of conspiracies tap very deeply into the history of the Enlightenment its vociferous critique of established authorities and a conception of political sovereignty fuelled by fear of counter plots for example Perhaps ultimately conspiracy theory affords us a renewed opportunity to reflect on our very relationship to the truth itself
