## **Micro Hydropower Design Manual:**

**Micro-hydro Design Manual** Adam Harvey, Andy Brown, Priyantha Hettiarachi, Allen Inversin, 1993-01 Micro Hydro Design Manual has grown from Intermediate Technology's field experiences with micro hydro installations and covers operation and maintenance commissioning electrical power induction generators, electronic controllers management and energy surveys. There is an increasing need in many countries for power supplies to rural areas partly to support industries and partly to provide illumination at night. Government authorities are faced with the very high costs of extending electricity grids. Often micro hydro provides an economic alternative to the grid. This is because independent micro hydro schemes save on the cost of grid transmission lines and because grid extension schemes often have very expensive equipment and staff costs. In contrast, micro hydro schemes can be designed and built by local staff and smaller organizations following less strict regulations and using off-the-shelf components or locally made machinery. *Micro-hydro Pelton Turbine Manual* Jeremy Thake, 2000. *The Micro-hydro Pelton Turbine Manual* Jeremy Thake, 2000. Where flow is limited but high heads of water are available, the Pelton wheel is one of the most useful turbines. It can be fabricated in small engineering shops with basic facilities. Jeremy Thake explains how to design, make and use them.

It is based on the experience gained through consultancy in dealing with various water resources issues and problems, teaching and research. It serves as a useful resource for graduate students and faculty members in civil engineering, agricultural engineering and water resources engineering as well as practicing engineers working in civil, environmental and agricultural fields. *Manual for Survey and Layout Design of Private Micro-hydropower Plants* Development and Consulting Service (Butwāl, Nepal), 1999
