Automated Learning - IDEAL 2008 Colin Fyfe, Dongsup Kim, Soo-Young Lee, Hujun Yin, 2008-11-04 IDEAL 2008 was the ninth IDEAL conference to take place earlier editions were held in Hong Kong the UK Australia and Spain This was the first time though hopefully not the last time that it took place in Daejeon South Korea during November 2-5 2008 As the name suggests the conference attracts researchers who are involved in either data engineering or learning or increasingly both The former topic involves such aspects as data mining or intelligent knowledge discovery from databases information retrieval systems data warehousing speech image video processing and multi media data analysis There has been a traditional strand of data engineering at IDEAL conferences which has been based on financial data management such as fraud detection portfolio analysis prediction and so on This has more recently been joined by a strand devoted to bioinformatics particularly

neuroinformatics and gene expression analysis Learning is the other major topic for these conferences and this is addressed by researchers in artificial neural networks machine learning evolutionary algorithms artificial immune systems ant algorithms probabilistic modelling fuzzy systems and agent modelling The core of all these algorithms is adaptation
