Corrosion Reza Javaherdashti, Farzaneh Akvan, 2017-03-16 Hydrostatic Testing Corrosion and Microbiologically Influenced Corrosion A Field Manual for Control and Prevention teaches industry professionals managers and researchers how to combat corrosion failure associated with hydrotesting It discusses how a test liquid must be selected how corrosion by bacteria should be controlled and how to eliminate the risk of leakage Rather than teaching how hydrotests should be conducted it helps the reader evaluate the quality of a hydrotest that s already been conducted in terms of oxygen scavenger use biocide testing inhibitor addition and water quality and explains the tasks that top and middle management must ensure are taken with respect to corrosion assessment of hydrotesting The manual also discusses microbiologically influenced corrosion MIC as the main corrosion mechanism related to post hydrotesting and offers essential knowledge on combating this corrosion process In addition to being a manual for top and middle management on how to deal with corrosion this book also *Microbiologically Influenced Corrosion*, 1984 **Microbially Induced Corrosion and its Mitigation** Ajay K.

Singh, 2020-09-24 This brief covers case studies on Microbial Induced Corrosion MIC and its mitigation After reviewing the basics of corrosion it focuses on MIC MIC is a special type of electrochemical corrosion in which the presence of microbes and bacteria alters the chemistry of liquid media so as to make them more corrosive These changes are harmful to metallic equipment processing machinery marine vessels etc in an environment that is host to a wealth of microorganisms A 2007 US survey estimated corrosion related damages to cost 276 billion a year roughly 50% of which are due to MIC The industries most affected by MIC are power production oil exploration transportation and storage water distribution and more generally all industries involving marine environments However means for effectively preventing and controlling MIC are poorly understood As such the book s later chapters address various mechanisms processes that show promise with regard to MIC mitigation Lastly the book discusses the strategies currently being explored to mitigate MIC using green technologies

Failure Modes, Effects and Causes of Microbiologically Influenced Corrosion Reza Javaherdashti, Farzaneh Akvan, 2019-10-22 Failure Modes Effects and Causes of Microbiologically Influenced Corrosion Advanced Perspectives and Analysis presents academic research about microbial corrosion MIC integrating it into engineering applications that result in a more thorough understanding of MIC and how it is recognized and treated In addition new concepts that will be useful in understanding integrity and corrosion management practices are explored This book will be useful for industry professionals particularly maintenance and operation engineers corrosion and material engineers and R D personnel working in the field of corrosion protection Focuses on the skills and knowledge necessary to understand how Failure modes and why Effects and Causes materials fail Explains why corrosion control measures such as the use of coatings cathodic protection and inhibitors are useful Discusses the practical side of MIC treatment in terms of fundamental concepts of time and cost of operation

Introduction to Corrosion Mgmt of Microbiologically Influenced Corrosion Richard Bruce Eckert, 2015

Microbially Influenced Corrosion of Materials Ewald Heitz, Hans-Curt Flemming, Wolfgang Sand, 1996 Corrosion has been largely considered to be caused only abiotically without regard of any biological influence However corrosion of organic materials metals minerals and plastics can be strongly influenced by microorganisms enhancing the kinetics of the corrosion processes This book presents case histories theoretical explanations and methods for the detection sanitation and prevention of biologically influenced corrosion

Recent Advances in the Study of Microbiologically Influenced Corrosion, 1993 The study of microbiologically influenced corrosion MIC has progressed from phenomenological case histories to a mature interdisciplinary science including electrochemical metallurgical surface analytical microbiological biotechnological and biophysical techniques With gene probes and microelectrodes it is now possible to measure interfacial dissolved oxygen dissolved sulfide and pH and to further determine the microbial species responsible for the localized chemistry Biofilms can be tailored to contain consortia of specific microorganisms and naturally occurring biofilms can be dissected into cellular and extracellular constituents Scanning vibrating electrodes can be used to map the distribution of anodes and cathodes so that localized corrosion can be correlated with the location of microorganisms The development of environmental scanning electron atomic force and laser confocal microscopy makes it possible to image cells on surfaces and to accurately determine the spatial relationship between microorganisms and corrosion Transport of nutrients through biofilms is being modeled using techniques including optical density measurements to precisely locate the water biofilm interface and nuclear magnetic resonance imaging to visualize flow characteristics near surfaces colonized with microorganisms The way in which these now techniques can be used to understand fundamental mechanisms and to discriminate critical issues of MIC will be discussed Biofouling Corrosion Biodeterioration Electrochemistry
