Schlesinger, 2011-07-21 Considering that getting along in civil society is based on the expectation that most people will do what they say they will do i.e. essentially live up to their explicit or implicit promises it is amazing that so little scientific attention has been given to the act of promising A great deal of research has been done on the moral development of children for example but not on the child's ability to make and keep a promise one of the highest moral achievements What makes it possible developmentally cognitively and emotionally to make a promise in the first place And on the other hand what compels one to keep a promise or vow or threat when there seems to be no personal advantage in doing so and even when harm can be predicted How do we know when a promise is offered seriously to be taken at face value and how do we understand that another is only a polite gesture not to be taken seriously In *Promises Oaths and Vows* On the Psychology of Promising Herbert Schlesinger addresses these questions drawing on the literature of moral development in children the psychotherapy of a patient who regularly broke promises that were unnecessary in the first place those who were regarded as promising youngsters who did not fulfill their promise and those who feared making a promise a commitment or a threat out of fear that once made the utterance would take on a life of its own and could never be taken back Furthermore he illustrates his conclusions by examining the widespread use of promising in classical literature such as Greek drama and the plays of Shakespeare as well as the motivating and reifying power of the promise in Western religious traditions With a style honed over the penning of two previous books Schlesinger once again produces a work grounded in a firm analytic sensibility but which also retains the wit and candor of the seasoned analyst His seminal investigation of this all but neglected topic in the clinical literature is as timely as it is scholarly and with the title firmly in mind *Promises Oaths and Vows* is assured to be a worthy addition to any clinician's library and a provoking investigation into Nietzsche's notion of man as the animal who makes promises *Jesus Son of God* Lynda Hackford, 2017-06-18 Jesus son of God is our Game Changer In our Lord Jesus Christ there is always hope for all who have faith and trust in his Holy name trusting in him because he has changed the world our life is so brief yet he came to give us life and everlasting hope Jesus son of God is our game changer he came to our world over 2000 years ago to tell his parables stories about how things will go and the things our Messiah said still haunt the world today he taught about love and faith to believe in all he teaches he taught us truth We who believe hunger and thirst for this amazing man who came to save all we think then say we should think more like him and try harder and do what he says When we experience his love it is then that we realize he is right he is telling us the truth it's becomes so real in our hearts he is transforming us to be more like him in our thoughts and behaviour we see the light he is willing to reach out to us and save us giving us life everlasting these words are the most

important words to give to his children done through repentance and with a sorrowful heart Jesus Christ is our game changer Jesus Christ is our saviour and our King let Jesus be a game changer in your life as he was for me feel his love faith and mercy believe and let him take you by the hand and lead you to life everlasting AMEN God bless you all Lynda Hackford
