**The Myth and Propaganda of Black Buying Power** Jared A. Ball, 2020-04-01 This Palgrave Pivot offers a history of and proof against claims of buying power and the impact this myth has had on understanding media race class and economics in the United States. For generations Black people have been told they have what is now said to be more than one trillion dollars of buying power and this book argues

that commentators have misused this claim largely to blame Black communities for their own poverty based on squandered economic opportunity This book exposes the claim as both a marketing strategy and myth while also showing how that myth functions simultaneously as a case study for propaganda and commercial media coverage of economics In sum while buying power is indeed an economic and marketing phrase applied to any number of racial ethnic religious gender age or group of consumers it has a specific application to Black America *The Publishers Weekly*,1899 Cumulative Book Index,1998 A world list of books in the English language The Publishers' Circular and General Record of British and Foreign Literature,1875 *Book of Days* C.
