THE BOOK Scale refers to the relationship between model trains and the real thing O scale used to be called 1 48 with HO scale at 1 87 but measurements have changed somewhat For the novice it s best to not get too mired in scale details Suffice it to say that O scale is the largest model train and is not very common as it requires more space than most people can allot HO scale is the most prevalent and the standard for most model railroaders having the most product selection availability N is smaller than HO and although there is a good selection many hobbyists prefer HO since N requires a higher degree of detail and ability to work with miniature parts Much depends on individual preference If you just want miles and miles of track and lots of trains going around N is great If you want to re create an elaborate scene with buildings people and geographical features HO is better If you get into model railroad building in a big way you may eventually want to explore other scales but most model train hobbyists are happiest with HO or N Buy a copy to keep reading *101 Projects for Your Model Railroad* Robert Schleicher,2002 From Robert Schleicher 2nd recipient of the Layout Design Award for Excellence
