*AI Battle Royale* Ashley Marc Recanati,2023-03-26 AI Big Data and other 4th Industrial Revolution technologies are poised to wreak havoc in virtually every industry unlocking huge

productivity gains via automation of labor both manual and cognitive Less discussed are the impacts on workers who see the value of their skills erode along with the menace of mass structural unemployment How can workers assess their vulnerabilities What can they do to improve their prospects effective immediately In this book you will learn how to Survey new tech and decrypt their potential impacts on work Assess your strengths and weaknesses in the face of AI the shared economy and other tech propelled threats Foment a battle plan to survive and thrive Ashley Recanati provides guidance for employees to rise above their peers and preserve their value in a book that will interest managers and scholars but foremost destined to ordinary workers

*AI, Ethics, and Discrimination in Business* Marco Marabelli, 2024-05-02 This book takes a historical approach to explore data algorithms their use in practice through applications of AI in various settings and all of the surrounding ethical and DEI implications Summarizing our current knowledge and highlighting gaps it offers original examples from empirical research in various settings such as healthcare social media and the GIG economy The author investigates how systems relying on a binary structure machines work in systems that are instead analogic societies Further he examines how underrepresented populations who have been historically penalized by technologies can play an active role in the design of automated systems with a specific focus on the US legal and social system One issue is that main tasks of machines concern classification which while efficient for speeding up decision making processes are inherently biased Ultimately this work advocates for ethical design and responsible implementation and deployment of technology in organizations and society through government sponsored social justice in contrast with free market policies This interdisciplinary text contributes to the timely and relevant debate on algorithmic fairness biases and potential discriminations It will appeal to researchers in business ethics and information systems while building on theories from anthropology psychology sociology management marketing and economics

The AI Music Problem Christopher W. White, 2025-06-16 Music poses unique and complex challenges for artificial intelligence even as 21st century AI grows ever more adept at generating compelling content The AI Music Problem Why Machine Learning Conflicts With Musical Creativity probes the challenges behind AI generated music with an investigation that straddles the technical the musical and the aesthetic Bringing together the perspectives of the humanities and computer science the author shows how the difficulties that music poses for AI connect to larger questions about music artistic expression and the increasing ubiquity of artificial intelligence Taking a wide view of the current landscape of machine learning and Large Language Models The AI Music Problem offers a resource for students researchers and the public to understand the broader issues surrounding musical AI on both technical and artistic levels The author breaks down music theory and computer science concepts with clear and accessible explanations synthesizing the technical with more holistic and human centric analyses Enabling readers of all backgrounds to understand how contemporary AI models work and why music is often a mismatch for those processes this book is relevant to all those engaging with the intersection between AI and musical creativity today
