Modern Sculpture, Its Methods and Ideals Herbert Maryon, 1933 *Modern Sculpture* Douglas Dreishpoon, 2022-10-25 This tapestry of primary sources is an essential primer on sculpture and its makers. Modern Sculpture presents a selection of manifestos, documents, statements, articles, and interviews from more than ninety sculptors, including a diverse selection of contemporary sculptors. With this book, editor Douglas Dreishpoon defers to artists whose varied points of view illuminate sculpture's transformation from object to action, concept to phenomenon, over the course of more than a century. Chapters arranged in chronological sequences highlight dominant stylistic, philosophical, and thematic threads uniting kindred groups. The result is an artist centric history of sculpture as a medium of consequence and character.

[ICGG 2024 - Proceedings of the 21st International Conference on Geometry and Graphics](#) Kazuki Takenouchi, 2024-09-26 This three volume book gathers peer-reviewed papers presented at the 21st International Conference on Geometry and Graphics ICGG 2024 held in Kitakyushu, Japan, from 5 to 9 August 2024. The conference started in 1978 and is promoted by the International Society for Geometry and Graphics, which aims to foster international collaboration and stimulate the scientific research and teaching methodology in the fields of Geometry and Graphics. The ICGG 2024 covered the following five topics taken over from ICGG 2022: Theoretical Graphics and Geometry, Applied Geometry and Graphics, Engineering Computer Graphics, Graphics Education, Geometry and Graphics in History, to which a new section of Related Topics was added in response to the growing body of research on Geometry and Graphics. Volume 3 collects papers on two of these topics: Engineering Computer Graphics and Geometry and Graphics in History, as well as poster papers on all these topics. Given its breadth of coverage, the book will introduce engineers, architects, and designers interested in computer applications, graphics, and geometry to the latest advances in the field, with a particular focus on science, the arts, and mathematics education.

[Contemporary Sculpture Techniques: Welded Metal and Fiberglass](#) John Baldwin, 1967

Modern Sculpture Reader Jon Wood, David Hulks, Alex Potts, 2012-08-21 In many anthologies of art, sculpture is given short shrift in relation to other media. If it is treated at all, *Modern Sculpture Reader* aims to rectify this situation by presenting a collection of important texts that have defined sculpture's radically changing status and role since the end of the nineteenth century, a time marked by a general reappraisal of the forms and functions of art. From the rigorously theoretical to the experimental and poetic, *Modern Sculpture Reader* offers a lively discourse on the medium by a range of artists, writers, critics, and poets: Marcel Duchamp, Louise Bourgeois, Claes Oldenberg, André Breton, Ezra Pound, and Clement Greenberg, in a variety of genres: poems, lectures, transcribed interviews, newspaper and magazine articles, and artists' statements. These diverse text selections offer valuable insight into the development of the critical language of sculpture and its connections to other media in an era of increasingly conceptual artistic practice. Many of the essays highlight key ongoing concerns, such as

sculpture's physical properties and conditions of display both of which have important implications for the viewer's tactile and emotional interaction with sculptural works *Contemporary Stone Sculpture* Dona Z. Meilach, 1970 *Triumphs and Wonders of the 19th Century* James Penny Boyd, 1899 **Bernini Ephemeral and Preparatory Sculpture** Genevieve Warwick, 2025-04-29 Taking up questions of artists' materials and technical processes currently at the vanguard of art historical scholarship this book studies the contiguity and interchange of workshop methods in the linked fabrication of both ephemeral and preparatory works by Bernini. Genevieve Warwick argues that the ephemeral arts of ritual occasion acted as a locus of artistic experiment for the artist in many respects similar to his use of preparatory models to suggest that Bernini's artistry sprang from the fabric of ritual in both material and cultural terms. From processional floats to court stage sets for the ritual occasions of church and state such ephemeral arts were largely made of wax, clay, paper, and wood, stucco, and plaster assembled into scenographic ensembles with textiles, canvas, and paint. Similarly, Bernini's preparatory models for marble or bronze sculpture were of plaster and clay, even mud and straw or wax and painted wood, as plentiful and affordable materials that were readily available for use and reuse as required.
