**Studying brain structure and function. A way to gain better understanding of social interaction?** Engin Devekiran, 2016-11-29 Essay from the year 2016 in the subject Medicine Neurology Psychiatry Addiction grade First Class honors Trinity College Dublin Department of Psychology course Social Neuroscience language English abstract Are we gaining a better understanding of social interaction through studying brain structure and function In the following text the this question will be carefully enlightened from different perspectives After a definition of the research area of social neuroscience its most prominent method the functional magnetic resonance imaging method fMRI will be discussed Subsequently problems and stumbling blocks in neuroscientific argumentation will be addressed by analyzing two studies using the fMRI method It will be outlined why the overoptimistic evaluation of the explanatory potential of neuroscientific results and the relating arrogant attitude of some researchers feeds the critics In the next step a selection of important findings of the last 16 years will be used to prove the importance of social neuroscience for a better understanding of social interaction This will include examining the structures of the social brain Eventually there will be enough evidence collected to come to a profound evaluation of the claim in the title

**Neuroscience and Social Science** Agustín Ibáñez, Lucas Sedeño, Adolfo M. García, 2017-11-02 This book seeks to build bridges between neuroscience and social science empirical researchers and theorists working around the world integrating perspectives from both fields separating real from spurious divides between them and delineating new challenges for future investigation Since its inception in the early 2000s multilevel social neuroscience has dramatically reshaped our understanding of the affective and cultural dimensions of neurocognition Thanks to its explanatory pluralism this field has moved beyond long standing dichotomies and reductionisms offering a neurobiological perspective on topics classically monopolized by non scientific traditions such as consciousness subjectivity and intersubjectivity Moreover it has forged new paths for dialogue with disciplines which directly address societal dynamics such as economics law education public policy making and sociology At the same time beyond internal changes in the field of neuroscience new problems emerge in the dialogue with other disciplines Neuroscience and Social Science The Missing Link puts together contributions by experts interested in the convergences divergences and controversies across these fields The volume presents empirical studies on the interplay between relevant levels of inquiry neural psychological social chapters rooted in specific scholarly traditions neuroscience sociology philosophy of science public policy making as well as proposals of new theoretical foundations to enhance the rapprochement in question By putting neuroscientists and social scientists face to face the book promotes new reflections on this much needed marriage

while opening opportunities for social neuroscience to plunge from the laboratory into the core of social life This transdisciplinary approach makes Neuroscience and Social Science The Missing Link an important resource for students teachers and researchers interested in the social dimension of human mind working in different fields such as social neuroscience social sciences cognitive science psychology behavioral science linguistics and philosophy

**The Social Cognitive Neuroscience of Organizations, Volume 1118** Carl Senior, Michael J. Butler, 2008-01-14 Social cognitive neuroscience is an emerging branch of cognitive neuroscience that bridges together social psychology and neuroscience At its core is an understanding of the relationship between the brain and social interaction The social cognitive neuroscientist places empirical endeavor within a three stage framework and questions falling under the SCN rubric undergo interrogation at each of these three levels Firstly we seek to understand a neuroscience of social interactions at the social level Here we need to understand the motivational and other social factors that drive our behavior and experience in the real world It goes without saying that any study of the cognitive neuroscience of socially interactive behavior must first be informed by social psychological theory to maintain ecological validity Second the social cognitive neuroscientist must be an adroit cognitive psychologist and be able to examine interactive behavior from the cognitive level It is here that information processing models and theories are applied to the understanding of our social behavior Finally studies at the neural level seek to inform us about the cortical structures as well as the way they interact with other in the mediation of the previous cognitive level This volume brings together contributions from leading thinkers in both the social cognitive neurosciences and business to provide a comprehensive introduction and overview of a social cognitive neuroscience of the business brain NOTE Annals volumes are available for sale as individual books or as a journal For information on institutional journal subscriptions please visit [www.blackwellpublishing.com/nyas](http://www.blackwellpublishing.com/nyas) ACADEMY MEMBERS Please contact the New York Academy of Sciences directly to place your order [www.nyas.org](http://www.nyas.org) Members of the New York Academy of Science receive full text access to the Annals online and discounts on print volumes Please visit <http://www.nyas.org/MemberCenter/Join.aspx> for more information about becoming a member
