Discourse, Politics and Media in Contemporary China Qing Cao,Hailong Tian,Paul Chilton,2014-04-23 After three and a half decades of economic reforms radical changes have occurred in all aspects of life in China In an authoritarian society these changes are mediated significantly through the power of language carefully controlled by the political elites Discourse as a way of speaking and doing things has become an indispensable instrument for the authority to manage a fluid increasingly fragmented but highly dynamic and yet fragile society Written by an international team of leading scholars this volume examines socio political transformations of contemporary Chinese society through a systematic account analysis and assessment of its salient discourses and their production circulation negotiation and consequences In particular the volume focuses on the interplay of politics and media The book s intended readership is academics and students of Chinese studies language and discourse and media and communication studies *Researching Translation and Interpreting* Claudia V. emotions and reactions and fulfilling all the elements of newsworthiness it is hardly surprising that war makes good news. Modern technological advancements such as the camera and television brought the brutality of war into the homes and daily lives of the public. No longer a far away and out of sight affair, the public's ability to see what was happening on the frontline changed not only how wars were fought but why they were fought. Even when a war is considered popular, the involvement of the press and the weight of public opinion has led to criticisms that have transformed modern warfare almost in equal measure to the changes brought about by weapon technology. War reporting seeks to look beyond the official story to understand the very nature of conflict whilst acknowledging that it is no longer simply good versus evil. This edited volume presents a unique insight into the work of the war correspondent and battlefield photographer from the earliest days of modern war reporting to the present. It reveals how influenced by the changing face of modern warfare the work of the war correspondent has been significantly altered in style, method and practice. By combining historical analysis with experiences of modern day war reporting, this book provides an important contribution to the understanding of this complicated profession which will be of interest to journalists, academics and students alike.

Social Media and Society Majid KhosraviNik, 2023-04-15. Social Media and Society brings together a range of scholars working at the intersection of discourse studies, digital media and society. It is meant to respond to changes in discourse technologies, i.e. the technodiscursive dynamic of social media discourses. The book critically engages with the digital dynamics of representations around discourses of identity, politics and culture. Other than its topical focus on highly pertinent discourses, the book aspires to offer some fresh insights into the theory, methods and implementation of CDS in digital environments. The book can be viewed as part of the developing research framework of Social Media Critical Discourse Studies which seeks to integrate the impact of new mediation technologies on discursive meaning making with its critical contextualisation. In addition to its strongly global outlook, the book incorporates a wide range of research perspectives including CDA, sociolinguistics, political discourse studies, media and technology, discourse theory, popular culture, feminism etc.

Discourses in Action Klaus Krippendorff, Nour Halabi, 2020-01-20. This interdisciplinary collection brings together leading and emerging scholars of discourse conceptualizing how discursive practices shape social, political and even material realities today. Discourses in Action presents a wide range of essays that explore fundamental concerns for the social consequences of text, talk and discursively informed actions and possibilities of discursive engagement. It opens new perspectives on what language does and the differences that scholarly and practical contributions can make. Chapters cover diverse topics ranging from political struggles, climate change, social revolutions, ethnicity, violence and other often unexpected patterns of discursive consequences. Its essays also explore the cultural contingencies that underlie discourse practices which are usually ignored when analysed from within a taken-for-granted culture. Providing a useful examination of current discourse studies, this interdisciplinary volume is ideal for students and researchers within media communication, discourse analysis, linguistics.
