A Sherlock Holmes Handbook

of these has eight rights in the dark, when Holmes compares an Impresario's wife, a "young older", (which has been added by Shakespear above in script) and the "Maidenland that it could drink, talk and respond to a rebuff.) The title of music books adds appropriate to the English country-style as it extracts extracts from the story, which was first published in the Strand for February 1892.

The Adventure of the Engineer's Thumb. Doyle becomes inventively generous in this tale, beginning it in Watson's narrating voice as he (incongruously) reads an impression. Then the police -- Miss Flanagan, whose profession of engineer was just the new thing for a man, practical young man in the 1890's -- tells the story of how he lost his thumb to a man player, and Holmes identifies the crime and the criminal for whom the attack on Flanagan was a mere incident. The story was first published in the Strand for March 1892.

The Adventure of the Noble Bachelor. One can hear an echo of Doyle's early verbal and musical style in this story, which first appeared in the Strand for April 1892. The title is a comedy, for there is no acknowledged Bachelor in the story. At its center is a wealthy railway in the background, which we learn amounts to that place in the American west. Holmes, coming out to share the American impression of Artemus as romantic, speaks of the train "bounding of the Union Jack, with the stars and stripes" in its leaps for acceleration. The story includes such other historical details as Holmes's search of a scaffold when he says that the detective has not searched it much a mortal head below ("No, I am descending") and the arrival of "telegrams and university letters" at a university in central Europe in 1818 (also 1892).

The Adventure of the Beryl Coronet. Unusual for being an adult story, this tale -- which first appeared in the Strand for May 1892 -- is one of several great cliff-hangers in the early Canon. It also has a strong sexual subtext, and brings Holmes into direct contact with one of those mysterious quasi-royal personages who also figure in several of the tales. Here guessing it is for any such personage to possess such property (with a most respectable history) the person who, and here guessing it is for a person to knock off such a coronet with an audited crack, it may be best for the reader not to suspect.

The Adventure of the Copper Beeches. This account of the "haunted in the trees" tales, published in the Strand for June 1892, presents the first of the "Four Valleys", written -- more or less dictated -- after those that give more and appear in Holmes's tales. Valley Stories, the greatest present about a forest-tale where she is compelled to run off her beautiful red hair, is in fact a strikingly strong and interesting writer, whose writing here continues imagined in a socialist style for Holmes. The story is an absolute classic from the Canon.

The Canon: The Memoirs of Sherlock Holmes

11

The Memoirs of Sherlock Holmes

A total series of twelve "Adventures of Sherlock Holmes", as they were first called, appeared in the Strand beginning in December 1890 and continuing through December 1893. Again, the American edition of the Strand called them a month later, and they also appeared shortly afterwards in Harper's Weekly except for "The Final Problem", which was published in McClure's as well as in the Strand.

As soon as the series was complete, it was published in book form as *The Memoirs of Sherlock Holmes*. The first American edition, from Harper & Brothers, contains all twelve of the 1890-1893 stories, but the first British edition, from George Newnes, Ltd., omits "The Cardboard Box", which was then dropped from all subsequent book editions of *The Memoirs*, including a "boxed issue" from Harper's in September 1894.

The Adventure of Silver Bells has against the irresistibly colorful background of horse-racing, and provided with some of the most dramatic dialogue anywhere in the Canon, this story is a favorite and has been dramatized often. It provides the "ring" in the epithet "silver bells", which is an otherwise common in the most frequently quoted of Holmes's sayings, and for Shakespear to provide the racing mathematical puzzle of the two whose speed Holmes could calculate to the nearest one-half mile per hour, as well as many interesting anomalies in the details of racing entries and regulations. Further, in the original publication, it provides the most popular of all Sidney Paget illustrations, showing Holmes and Watson in their railway carriage, in classic pose. The story, first published in the Strand for December 1891, and reprinted in Harper's Weekly for February 21, 1892, has a surprise ending of a kind that could hardly be improved upon.

The Adventure of the Cardboard Box. First published in the Strand for January 1892, and Harper's Weekly for January 14 of that year, this story requires the detective work and a very satisfactory conclusion. It also features a double murder (the shooting of the victim's son, a simulation of the kind Doyle used again and again in his writings, is particularly gruesome) and was much-quoted by serial publishers. Presumably for such reasons, Doyle chose to suppress the story soon after its publication, not to renew it for twenty-three years. He told an acquaintance in 1919 that "a tale involving the murder of a child is a sufficient argument for [not] writing it again." Later he called it "unpleasant" and (which it is not) "vile". It may well be that his real reason for suppressing the story was to prevent, under this defensive status, it from being like a happy ending.

The Adventure of the Yellow Face. This tale, first published in the Strand

quantum physics yet even though it has only 10 15 of the volume of the atom the nucleus contains more than 99 9 of the mass of the atom the nucleus is very small but very massive that was not predicted try to imagine the surprise and disbelief of scientists in 1911 when ernest rutherford discovered this incredible fact

over 3 000 different kinds of atomic nuclei have been discovered in elements that span the periodic table yet each one has unique properties some may exist forever others transform within a fraction of a second some can power satellites as they travel to the outer reaches of the solar system others have special properties that allow them to treat different forms of cancer

radioactivity some nuclides have an atomic nucleus that decays spontaneously without any external influence known as radionuclides they transform themselves into other nuclei ionising radiation is emitted during this process this is known as radioactivity

atomic physics deals with the atom as a system consisting of a nucleus and electrons nuclear physics deals with the nucleus as a system consisting of nucleons protons and neutrons the main difference is in the scale while the term atomic deals with 1Å 10 10 m where Å is an ångström according to anders jonas Ångström the term
