*Catalogue 2.0* Sally Chambers, 2013-07-23 Will there be a library catalogue in the future and if so what will it look like In the last 25 years the library catalogue has undergone an evolution from card catalogues to OPACs discovery systems and even linked data applications making library bibliographic data accessible on the web At the same time users expectations of what catalogues will be able to offer in the way of discovery have never been higher This groundbreaking edited collection brings together some of the foremost international cataloguing practitioners and thought leaders including Lorcan Dempsey

Emmanuelle Berm s Marshall Breeding and Karen Calhoun to provide an overview of the current state of the art of the library catalogue and look ahead to see what the library catalogue might become Practical projects and cutting edge concepts are showcased in discussions of linked data and the Semantic Web user expectations and needs bibliographic control the FRBRization of the catalogue innovations in search and retrieval next generation discovery products and mobile catalogues Readership Cataloguers and metadata specialists library administrators and managers responsible for planning and strategy systems librarians user services managers electronic resources librarians and digital library project managers

students on cataloguing information management and digital library courses *Open Source Library Systems* Robert Wilson, James Mitchell, 2021-09-11 Open source software and applications are all around us and it s no different in today s

libraries Knowing about the open source alternative to integrated library system and being able to make accurate comparisons can save a library tens to hundreds of thousands of dollars a year while more closely matching the library s functional needs The fact is that the foundational software in place in nearly every industry is being built with open source components Where software applications are still proprietary or closed those systems are themselves often built upon open source applications like open source web services database management systems programming languages and operating systems It s the same story in the library world Library software providers offering the latest and greatest software solution for many thousands of dollars a year are building these solutions with open source software However full fledged open source applications built with the same underlying technologies are available to libraries at no cost for the software itself

Each of these applications have their own unique and interesting history and communities supporting them For the reader unfamiliar with open source software or apprehensive about using these applications in their library this guide introduces the history of open source demonstrate the global upward trend of adopting open source technologies in general and within libraries in particular debunk various myths about implementing and using open source technologies discusses several different types of library information systems including Integrated Library Systems Institutional Repositories Digital Asset Management Systems Online Public Access Catalogs Resource Sharing Electronic Resource Management and lastly shares real world experiences in getting started with open source solutions including discussing what systems and services are available and best practices for implementation and use **Digital Libraries and Institutional Repositories: Breakthroughs in**

**Research and Practice** Management Association, Information Resources, 2020-03-06 Technology has revolutionized the ways in which libraries store, share and access information as well as librarian roles as knowledge managers. As digital resources and tools continue to advance, so too do the opportunities for libraries to become more efficient and house more information. Effective administration of libraries is a crucial part of delivering library services to patrons and ensuring that information resources are disseminated efficiently. Digital Libraries and Institutional Repositories: Breakthroughs in Research and Practice addresses new methods, practices, concepts and techniques as well as contemporary challenges and issues for libraries and university repositories that can be accessed electronically. It also addresses the problems of usability and search optimization in digital libraries. Highlighting a range of topics such as content management, resource sharing and library technologies, this publication is an ideal reference source for librarians, IT technicians, academicians, researchers and students in fields that include library science, knowledge management and information retrieval.
