Powell,2012-01-12 Animals that must hunt and kill for at least part of their living are inherently interesting to many people
and the role that carnivores play in biological communities attract interest from ecologists and conservation biologists
Conflicts with human activities stimulate continual debates about the management of carnivore populations and throughout
the world people seek workable solutions for human carnivore coexistence This concise yet authoritative handbook describes
research methods and techniques for the study and conservation of all terrestrial carnivore species Particular attention is
paid to techniques for managing the human carnivore interface Descriptions of the latest methodologies are supported by
references to case studies whilst dedicated boxes are used to illustrate how a technique is applied to a specific land cover
type species or particular socio economic context The book describes the most recent advances in modelling the patterns of
animal distributions movements and use of land cover types as well as including the most efficient methods to trap handle
and mark carnivores Carnivores are biogeographically diverse and whilst extensive scientific research has investigated many
aspects of carnivore biology not all species have been equally covered This book is unique in its intention to provide practical
