New Scholarship in Critical Quantitative Research, Part 2: New Populations, Approaches, and Challenges Ryan S. Wells,Frances K. Stage,2015-05-04 This volume is the second in a two part series on differentiating approaches to quantitative research from more traditional positivistic and postpositivistic approaches While the first volume provided an expanded conceptualization of critical quantitative inquiry this volume concludes the series by applying critical quantitative approaches to new populations of college students who are rarely addressed in institutional and higher education research such as American Indian Alaska Native and students with disabilities applying the principles of quantitative criticalism to advanced methods of statistical analysis and discussing the variety of challenges to overcome and presenting a future research agenda using these methods This work is of interest to institutional and higher education researchers who want to expand and critique new ways of thinking about the broad array of populations participating in and served by higher education while keeping in mind the goals of revealing inequity challenging marginalization and helping all students to succeed This is the 163rd volume of this Jossey Bass quarterly report series Timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

[Toward a Scholarship of Practice](#) John M. Braxton,2017-07-17 Ensure that your institutional policy and practice are guided by empirical research and scholarship rather than by mere common sense trial and error or a shoot from the hip basis for institutional action The two primary goals of a scholarship of practice are 1 improving administrative practice in higher education and 2 developing a knowledge base to guide such practice To attain these goals campuses must use the findings of empirical research as the basis for developing institutional policy and practice The result Improved administrative practice in higher education both at a campus level and for higher education as a social institution This is the 178th volume of the Jossey Bass quarterly report series New Directions for Higher Education Addressed to presidents vice presidents deans and other higher education decision makers on all kinds of campuses it provides timely information and authoritative advice about major issues and administrative problems confronting every institution

The Scholarship of Teaching and Learning in Canada:

Institutional Impact Nicola Simmons,2016-06-20 The Scholarship of Teaching and Learning SoTL is a growing area in which post secondary educators from any discipline investigate their teaching and their students learning sharing those results with others The purpose of this volume of New Directions for Teaching and Learning is to provide examples and evidence of the ways in which post secondary institutions in Canada have developed and sustained programs around the Scholarship of Teaching and Learning that impact the institutional pedagogical climate

New Scholarship in Critical Quantitative Research, Part 1: Studying Institutions and People in Context Frances K. Stage,Ryan S. Wells,2014-06-24 This volume presents work focused on underrepresented persons in a variety of levels of higher education

Each scholar has used critical quantitative approaches to examine access and or success in the higher education arena. Their scholarship pushes the boundaries of what we know by questioning mainstream notions of higher education through the examination of policies the re framing of theories and measures the reexamination of traditional questions for nontraditional populations. The work is divergent but the commonality of the presentations lies in each scholar's critical approach to conventional quantitative scholarship. Their research highlights inequities and explores factors not typically included in conventional quantitative analysis. This is the 158th volume of this Jossey Bass quarterly report series. Always timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation and institutional management.

Doing the Scholarship of Teaching and Learning, Measuring Systematic Changes to Teaching and

Improvements in Learning Regan A. R. Gurung, Janie H. Wilson, 2014-01-02. The Scholarship of Teaching and Learning (SoTL) should be an integral part of every academic's life, representing not only the pinnacle of effortful teaching but also standing side by side with more conventional disciplinary scholarship. Although practiced by many instructors for years, SoTL has garnered national attention, resulting in a spate of new journals to publish pedagogical research. SoTL helps students, fosters faculty development, and has been integrated into higher education. This volume provides readers with challenges that will motivate them to engage in SoTL and take their pedagogical research further. We include many key features aimed to help both the teacher new to research and SoTL and also researchers who may have a long list of scholarly publications in non-pedagogical areas and who have not conducted research. This is the 136th volume of this Jossey Bass higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

Christian Faith and Scholarship: An Exploration of Contemporary Developments Todd C. Ream, Perry Lynn Glanzer, 2007-09-17. In the twenty-first century, religious faith has reemerged from the margins of modernism and moved back to the center of contemporary scholarly conversations. When Jacques Derrida died, Stanley Fish recently wrote, I was called by a reporter who wanted to know what would succeed high theory and the triumvirate of race, gender, and class as the center of intellectual energy in the academy. I answered like a shot: religion. A group of evaluators of the Lilly Endowment's Initiative on Religion and Higher Education recently agreed. There is today more discussion about the role of religion in the academy than at any time in the past 40 years and more commitment to the project of Christian higher education than there was just ten years ago. In recognition of these developments, this particular monograph offers an overview of the various ways conversations about religion and religiously informed scholarship are increasing in the academy. Although a growing number of faith traditions are finding their place in this conversation, the Christian tradition in its various forms is still the dominant voice. This monograph addresses the history of secularization in American higher education and scholarship, the historical and

resistance by dominant religious traditions to that secularization the contemporary ways that individual scholars networks and institutions approach the question of religious faith and scholarship the concerns such a question raises for academic freedom and the relationship between religious faith and scholarship *Dramatics*, 2008-09 *Chef*, 2007 **Saturday**
