### **Advances in Financial Planning and Forecasting (New Series) Vol 4** Cheng F. Lee, Alice C. Lee, 2010-12-01

Advances in Financial Planning and Forecasting New Series is an annual publication designed to disseminate developments in the area of financial analysis planning and forecasting. The publication is a forum for statistical, quantitative and accounting analyses of issues in financial analysis and planning in terms of finance accounting and economic data.

#### Interest Rate Risk Models

Anthony G. Cornyn, 1997 Practical guide for asset liability managers faced with the decision as to whether to build or buy a financial model. Topics include modeling cash flows, net investment income versus net portfolio value projections of interest rates and volatility. A guide for asset liability managers and other investment professionals who are faced with the decision of whether to build or buy a financial model to measure, monitor and help manage their institution's risk exposure. It reviews the evolution of interest rate risk models and evaluates the state of the art models in use. Includes Modeling cash flows, modeling the term structure, OAS technology, net interest income versus net portfolio value, build versus buy analysis, practical methods for deriving input assumptions, prepayment rates, deposit decay rates, projections of interest rate and volatility.

*Evidence Based Labor and Delivery Management* Vincenzo Berghella, Gabriele Saccone, Tullio Ghi, Amanda Roman, 2019-02-28 This book is a guide to labour and delivery management for trainees in obstetrics and gynaecology and midwives. Divided into three sections, the text begins with detailed discussion on labour from preparation before labour and delivery through the different stages of labour to postpartum care. The next section covers caesarean delivery and the third special labour which explains labour complications, twins, prelabour, rupture of membranes and more. The book is authored by recognised experts from the USA and Italy and is based on evidence from randomised controlled trials (RCTs). Clinical photographs, diagrams and tables further enhance learning. Key points, Guide to labour and delivery management for trainees in obstetrics and gynaecology and midwives. Text based on evidence from randomised controlled trials (RCTs). Recognised author team from USA and Italy. Includes clinical photographs, diagrams and tables.

### **Coastal Oceanography of Washington and Oregon** M.R. Landry, B.M.

Hickey, 1989-03-01 The Washington Oregon coastal zone is a classical Eastern Boundary Current region. The area is

extremely productive the productivity dependent on near shore infusions of nutrients into surface layers during wind driven coastal upwelling The Washington Oregon coastline is much more regular than areas off California or off the East Coast where large capes lend complexity to both the physical environment and the ecosystem response The relatively straight coastline and broad deep shelf greatly simplify the physical environment so that processes responsible for much of the variance are more easily identified The system response from mid Oregon northward although not strictly two dimensional is more so than many other coastal areas Consequently the system is amenable to the testing of relatively simple models integrating wind forcing with physical chemical and biological responses in the upper water column This book is an integrated synthesis of physical chemical geological and biological research in a dynamic shelf ecosystem characterized by seasonal wind driven upwelling major river influences extensive silt deposits productive pelagic and demersal fisheries and unique surf zone communities The broad scope of the book includes detailed analyses of physical circulation and sediment transport production and utilization of organic matter in the marine food web river influences on regional hydrology and sediment deposition inputs and inventories of anthropogenic chemicals in the water column and sedimentary deposits Much of the book is based on primary analyses of previously unpublished data sets Interdisciplinary approaches are emphasized in models and discussions of coastal upwelling dynamics hydrographic patterns and anomalies benthic boundary layer processes and larval transport oceanographic influences on commercial stocks mechanics of chemical cycling and accumulation and surf zone production An extensive index and references complete the book The book is intended both to document and explain specific regional features of the Washington Oregon shelf system and more generally to illustrate the complexities of interactive influences on the dynamics of coastal ecosystems Oceanographers both researchers and students will be very interested in this book and it can also be used by governmental agencies and industries dealing with coastal zone management and planning

[Obstetrics: Normal and Problem Pregnancies E-Book](#) Mark B. Landon, Henry L. Galan, Eric R.M. Jauniaux, Deborah A. Driscoll, Vincenzo Berghella, William A. Grobman, Sarah J. Kilpatrick, Alison G. Cahill, 2020-02-17
