### **Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy** Tessa

Morrison,2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete's *Sforzina* Albrecht Durer's *Fortified Utopia* Tommaso Campanella's *The City of the Sun* Johann Valentin Andreae's *Christianopolis* Joseph Michael Gandy's *An Agricultural Village* Robert Owen's *Villages of Unity and Cooperation* James Silk Buckingham's *Victoria* Robert Pemberton's *Queen Victoria Town* King Camp Gillette's *Metropolis* and Bradford Peck's *The World a Department Store* Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts

**From Lived Experience to the Written Word** Pamela H. Smith,2022-09-23 This book focuses on how literate artisans began to write about their discoveries starting around 1400 in other words it explores the origins of technical writing Artisans and artists began to publish handbooks guides treatises tip sheets graphs and recipe books rather than simply pass along their knowledge in the workshop And they tried to articulate what the new knowledge meant The popularity of these texts coincided with the founding of a new philosophy that sought to investigate nature in a new way Smith shows how this moment began in the unceasing trials of the craft workshop and ended in the experimentation of the natural scientific laboratory These epistemological developments have continued to the present day and still inform how we think about scientific knowledge
