Meta The Second Wave:

The Second Wave Tom Reynolds, 2014-09-30 Summer is over and Connor Connolly is headed back to school to start junior year. But with metabands falling from the sky the world has changed overnight and now there are thousands of new metahumans. Just like regular humans not all metahumans are using their new powers for good. Now Connor is not only dealing with the pressures of being a super human and training with his mentor Midnight he also has to balance relationships with the people he cares for most. People who find themselves on different sides of the fence when it comes to their feelings about the new metahumans and the impact they're having on everyone else's lives. As the world struggles to adjust to the events of the past few months Connor's alter ego Omni works with The Agency to apprehend law breaking metahumans and detain them at the Silver Island Meta Detention Facility. When he's recruited for a job assisting the government agency with disarming one of the most powerful and secretive metas in Bay View City he never expects the devastation of that mission or the affect it will have on both humans and metas. Is Connor capable of becoming the hero he wants to be? Unedited summary from back cover

A Second-Wave Positive Psychology in Counselling Psychology Paul T. P. Wong, 2023-03-31

This book on the new paradigm of existential positive psychology (PP2.0) or second wave positive psychology focusses on the importance of transcending or transforming negative experiences and emotions to achieve durable flourishing. The book offers exciting new concepts and skills in the practice of counselling psychology. Positive psychology is evolving due to changing times and circumstances. PP2.0 opens new vistas for research and interventions in counselling psychology and positive psychology. Instead of relying only on the positives it posits the importance of navigating an optimal balance between positives and negatives in each context. It emphasizes the importance of inner peace, balance and harmony rather than the pursuit of happiness or positive emotions. More importantly PP2.0 is based on meeting the basic human needs for 1) the need to be liberated from the suffering and human bondage, 2) the hope of achieving a meaningful future, 3) the need to relate to others in a compassionate and authentic way so that people can experience genuine kindness and love, and 4) the deep seated spiritual need for a sense of oneness with a Higher Power or nature. This volume explores ways to help individuals to be liberated from their inherent limitations and at the same time empower them to achieve their highest aspirations. With an updated Introduction this book is the ideal companion for any student or practitioner looking for an insightful overview of positive psychology including humanistic psychology, existential positive psychology as well as counselling psychology. The chapters in this book were originally published as a special issue of *Counselling Psychology Quarterly*.

It lays the foundation for a new theory of mental well being based on a hierarchical perspective of positive mental health and guided by the concept of positive balance. Written by a well known expert in the field, this book addresses the issue of positive balance related to physiological, emotional, cognitive, meta-cognitive, developmental and social ecological levels of an individual and analyses the factors at each level that contribute to an individual's positive mental health experience. It discusses in detail the effects of neurochemicals such as dopamine, serotonin or cortisol, positive and negative affect, satisfaction in salient and multiple life domains vis-à-vis dissatisfaction in life domains, positive versus negative evaluations about one's life using certain standards of comparison, positive psychological traits of personal growth and intrinsic motivation, etc. vis-à-vis negative traits like pessimism and impulsiveness, and perceived social resources like social contribution and social actualization vis-à-vis perceived constraints like exclusion and ostracism.
