*A Method of Teaching Chemistry in Schools* A. M. Hughes, R. Stern, 2017-09-02 Trieste Publishing has a massive catalogue of classic book titles Our aim is to provide readers with the highest quality reproductions of fiction and non fiction literature that has stood the test of time The many thousands of books in our collection have been sourced from libraries and private collections around the world The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original Our readers see the books the same way that their first readers did decades or a hundred or more years ago Books from that period are often spoiled by imperfections that did not exist in the original Imperfections could be in the form of blurred text photographs or missing pages It is highly unlikely that this would occur with one of our books Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase Our staff has thoroughly reviewed every page of all the books in the collection repairing or if necessary rejecting titles that are not of the highest quality This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original and to the maximum degree possible gives them the experience of owning the original work We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality but also providing value to every one of our readers Generally Trieste books are purchased singly on demand however they may also be purchased in bulk Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates

**Chemistry in Schools** A. M. Hughes, 2015-06-25 Excerpt from *A Method of Teaching Chemistry in Schools* In this little book we have endeavoured to work out a new method of teaching elementary chemistry in schools a method based entirely upon the principle of working from the known to unknown Although not actually indicated in the book it is intended that every experiment should be suggested and carried out by the pupils the part of the teacher being only to guide and supervise At the same time the teacher must reserve the right of selecting the experiment to be done by the class when several have been suggested and in this way preventing time being wasted in trying experiments which would be of little value to the children and which would break the sequence of their work It will be found that by following this method of procedure the class can work along the main lines suggested by us although naturally the work must vary considerably in the hands of different teachers About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do

however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Modern Methods of Teaching Chemistry* D D Agarwal,2004 **Modern Methods of Teaching Chemistry** , *A Method of Teaching Chemistry in Schools (Classic Reprint)* A. Hughes,2018-02-04 Excerpt from *A Method of Teaching Chemistry in Schools* A rack of this size will hold about one hundred tubes and the contents of the tubes can be viewed at a glance It will be found that the endeavour to get good specimens for the collections will produce a spirit of healthy rivalry in the class and prove an excellent stimulus to careful and painstaking work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
