## Mind The Gap Study Guide Geography:

**Mind the Gap!** Gail Davidson, Julia Grey, Reneé Ferreira, South Africa. Department of Basic Education, 2012      **Mind the Gap!** Gail Davidson, 2012      South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with. Are there different and preferential equilibria we have not yet thought of or explored and if so what are they? In practical terms how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90/10 gap in the world and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin, the province of their birth and the wealth of their parents. Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not and why. Prof Lant Pritchett (Harvard University) There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well-trained teachers, early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few. Prof Martin Carnoy (Stanford University) Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence-based itinerary for the next few steps. Dr Luis Crouch (RTI)      **The Times Index**, 1997 Indexes the Times, Sunday Times and magazine Times literary supplement, Times educational supplement, Times educational supplement, Scotland and the Times higher education supplement      **Annual Report** South Africa. Department of Basic Education, 2016      British Education Index, 2005      Resources in Education, 1998      Differentiated Pathways of the Brain Dr. Linda Karges-Bone, 2010-09-01 Which colors can stimulate creative thinking? What scents might help to calm a child who has anxiety? Why do certain classroom groupings facilitate learning while others create tension? How can boys harness their boundless energy to attack language arts or girls draw on their strong verbal skills to make the most of a mathematics

problem Using current brain research this book discusses sensory rich learning techniques and gender specific teaching methods used to stimulate the minds of your students Based on Dr Kargas Bone's successful books Beyond Hands On and More Than Pink and Blue this resource is a must read for all teachers exploring differentiated pathways of the brain
