Online Textbook Pearson:

Financial Management: Principles and Applications J William Petty, Sheridan Titman, Arthur J Keown, Peter Martin, John D Martin, Michael Burrow, 2015-05-20 The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions.

Attention is paid to both valuation and capital markets as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems in short to educate students in finance.

Shaping the University of the Future Stephen James

Marshall, 2018-01-02 This book focuses on developing an understanding of the complex interplay of forces acting on individual universities and higher education systems to enable leaders and practitioners to take purposeful and strategic action. It explores the challenging landscape of higher education and the pressures that are reshaping the university as a societal institution, describing the complex interplay of technological, sociological, political and economic forces driving change. The issues analysed are global in scope reflecting the diversity of contexts but also the common nature of the challenges facing institutions individually and collectively. The analysis draws on the lessons learnt and evidence from over fifty organisational case studies undertaken by the author over the past decade exploring organisational change in higher education institutions in New Zealand, Australia, the United States and the United Kingdom and on his engagement as president of the ACODE organisation with colleagues responsible for learning technological change in Australasia. The book helps institutions respond to technological change purposefully in ways that build upon a clear understanding of the complex nature of the existing institution, its students and the organisational context.
