Programming Glenn Bachmann,1999 Artful Making offers the first proven research based framework for engineering ingenuity and innovation This book is the result of a multi year collaboration between Harvard Business School professor Robert Austin and leading theatre director and playwright Lee Devin Together they demonstrate striking structural similarities between theatre artistry and production and today s business projects and show how collaborative artists have mastered the art of delivering innovation on cue on immovable deadlines and budgets These methods are neither mysterious nor flaky they are rigorous precise and with this book s help absolutely learnable and reproducible They rely on cheap and rapid iteration rather than on intensive up front planning and with the help of today s enabling technologies they can be applied in virtually any environment with knowledge based outputs Moreover they provide an overarching framework for leveraging the full benefits of today s leading techniques for promoting flexibility and innovation from agile development to real options Real-World Decision Support Systems Jason Papathanasiou,Nikolaos Ploskas,Isabelle Linden,2016-12-19 This

book presents real world decision support systems i.e systems that have been running for some time and as such have been tested in real environments and complex situations the cases are from various application domains and highlight the best practices in each stage of the system's life cycle from the initial requirements analysis and design phases to the final stages of the project Each chapter provides decision makers with recommendations and insights into lessons learned so that failures can be avoided and successes repeated For this reason unsuccessful cases which at some point of their life cycle were deemed as failures for one reason or another are also included All decision support systems are presented in a constructive coherent and deductive manner to enhance the learning effect It complements the many works that focus on theoretical aspects or individual module design and development by offering good and bad practices when developing and using decision support systems Combining high quality research with real world implementations it is of interest to researchers and professionals in industry alike
