 the IFAC World Congress Sydney 1993 The goals of this workshop concerned the development comparison and classification
 of formal models in the field of Computer Integrated Manufacturing Systems in a descriptive as well as prescriptive way
 Computer Integrated Manufacturing Systems are able to integrate optimization methods simulation models procedures and
 knowledge based tools The target for the workshop activities were related to the specification of requirements for new
 models which are used in simulating and designing manufacturing management and control strategies including discrete
 event and continuous representations Technical areas of interest at the system level included tools for plant layout design
 process planning production planning and control Technical areas of interest at the component level included models for
 functional description of flexible manufacturing and assembly systems oriented to production activity control process
