Global University Ranking Systems: Methodologies, Impact, and Repercussions Kayyali, Mustafa, 2025-10-15

Global university ranking is a powerful tool in shaping the higher education landscape and influencing student decisions. These rankings develop various methodologies that assess academics, faculty, and research to offer a comparative framework to evaluate an institution. This growing prominence, however, has sparked debate about their accuracy and equity with marginalized and diverse educational missions. Global ranking systems analyze their broad impact on universities and stakeholders and critically examine their long-term repercussions for higher education. **Global University Ranking Systems: Methodologies, Impact, and Repercussions** explores the intricate world of global university rankings and their profound impact. This book determines how rankings shape global perceptions, determining which universities gain international prestige and which struggle to maintain relevance. Covering topics such as higher education rankings and education, this book is an excellent resource for administrators, faculty, policymakers, researchers, academicians, and more. **Academic Integrity Meets Artificial Intelligence** Ruth Baker-Gardner, 2025-11-13. **Academic Integrity Meets Artificial Intelligence** examines academic integrity practices in higher education institutions, HEIs in the Caribbean, assessing the current and potential impact of generative artificial intelligence tools on academic integrity and how HEIs globally have been responding.

Proceedings of the 2nd International Conference on Education Research Florinda Matos, Isabel Flores, Susana Martins, 2025. **The Proceedings of the 2nd International Conference on Education Research 2025** includes academic research papers, PhD research papers, Master's Research papers, and work in progress papers which have been presented and discussed at the ICER 2025 conference. The proceedings are of an academic level appropriate to a professional research audience, including graduates, post-graduates, doctoral and post-doctoral researchers. All papers have been double-blind peer-reviewed by members of the Review Committee. **Artificial Intelligence Risk Management** Kurt J. Engemann, 2025-12-01. **AI** demonstrates the potential to impact virtually every aspect of modern life, making it one of the most transformative technologies of our time. AI has a wide range of applications across various sectors, and as AI continues to evolve, its integration into various activities is expected to deepen further, changing how we work, live, and interact with the world around us. AI systems, from simple machine learning models to advanced autonomous agents, carry potential risks that can affect individuals, organizations, and society as a whole. Effective management of AI risks involves a comprehensive approach that includes risk identification, proactive mitigation strategies, and adherence to regulatory frameworks. By addressing these areas, stakeholders can navigate the complexities of AI development and ensure that these technologies are both beneficial and safe. As AI continues to evolve, so too must our strategies for managing its risks, requiring ongoing dialogue, research, and collaboration across all sectors of society. As AI technology advances, it's likely that more specific and stringent regulations will be developed both nationally and internationally to manage the integration of AI into society effectively. **HCI**
