Data Game Josh Williams, 2024-03-25 *Data Game The Story of Liverpool FC's Analytics Revolution* explores the lesser known story of how Liverpool rose to greatness in the 21st century with the help of big data. The Anfield institution is an industry leader in the field of data science but little is known about how Liverpool's relationship with numbers began and how the marriage of data and football helped to deliver wins on the pitch by impacting tactics and recruitment. Upon their takeover Fenway Sports Group set out to transform Liverpool into a data driven organisation but there is a story behind why that vision took around a decade to become a reality. From errors in the transfer market to suboptimal playing styles to conflicting egos Liverpool jumped many hurdles before achieving their ambitions under Jürgen Klopp with the German surrounded by unsung heroes who shunned the limelight. This is the tale of how Liverpool gained an edge over their wealthier rivals by getting smart.

The 21st Century in 100 Games Aditya Deshbandhu, 2024-06-20 *The 21st Century in 100 Games* is an interactive public history of the contemporary world. It creates a ludological retelling of the 21st century through 100 games that were announced, launched and played from the turn of the century. The book analyzes them and then uses the games as a means of entry to examine both key events in the 21st century and the evolution of the gaming industry. Adopting a tri-pronged perspective, the reviewer, the academic and an industry observer, it studies games as ludonarratological artefacts and resituates games in a societal context by examining how they affect and are engaged with by players, reviewers, the gaming community and the larger gaming industry.
