Forecasting Highway Construction Staffing Requirements Timothy R. B. Taylor,William Francis Maloney,2013 Adequate construction staffing is critical for performance of highway construction projects The variable nature of these projects however can make it difficult to estimate construction staff requirements for both the short and long term This study gathered information on the methods being used at highway transportation agencies to forecast staffing requirements These methods are diverse and range from simple heuristics based on generic project types to multi variate regression models developed from historical project data Information for this study was acquired through a literature review surveys of state transportation agencies and site visits to non state agencies

Timothy R B Taylor and William F Maloney University of Kentucky Department of Civil Engineering Lexington Kentucky collected and synthesized the information and wrote the report The members of the topic panel are acknowledged on the preceding page This synthesis is an immediately useful document that records the practices that were acceptable with the limitations of the knowledge available at the time of its preparation As progress in research and practice continues new knowledge will be added to that now at hand Preface    The Architect's Handbook of Professional Practice American Institute of Architects,2008-03-24 Architects must be proficient in a variety of business practices to contribute to manage or launch a successful firm They are responsible for the same kind of legal financial marketing management and administrative

activities as any other professional Within these broad categories however there are many details including professional standards and documents that are unique to the profession of architecture     **The Architects' Journal** ,2005

Daniel Prather,2016 Over the last several years airport operators have introduced green initiatives in order to improve the overall sustainability of their airports Drivers could include financial viability staffing considerations or other social or environmental factors There is a significant compilation of sustainability practices from larger airports but a less robust description of initiatives for smaller airports This report focuses on drivers and outcomes of green initiatives undertaken at small commercial and general aviation airports Information used in this study was acquired through a review of the literature and survey or interviews with airport operators at small and general aviation airports Although the study found that more than half of small airports have adopted one or more sustainable initiatives and almost 20% have a formal sustainability plan in place many of those participating in the study do not believe that their airport has an impact on the environment and because of lack of funding and different priorities they choose not to pursue sustainable initiatives However sustainability is more than environmental initiatives These are barriers but more airports will pursue sustainable initiatives if more funding is made available sustainability incentives are created or sustainability becomes a mandate
