Symeonides, 2021-01-11 Conflicts of laws arising from injuries to rights of personality such as defamation or invasion of privacy have always been difficult if only because they implicate conflicting societal values about the rights of freedom of speech and access to information on the one hand and protection of reputation and privacy on the other hand. The ubiquity of the internet has dramatically increased the frequency and intensity of these conflicts. This book explores the ways in which various Western countries have addressed these conflicts but also advances new practical ideas about how these conflicts should be resolved. In this the fourth edition of Private International Law and the Internet Professor Dan Svantesson provides a detailed and insightful account of what has emerged as the most crucial current issue in private international law that is how the Internet affects and is affected by the five fundamental questions. When should a lawsuit be entertained by the courts. Which state's law should be applied. When should a court that can entertain a lawsuit decline to do so. How wide scope of jurisdiction should be afforded to a court with jurisdiction over a dispute. And will a judgment rendered in one country be recognized and enforced in another. Professor Svantesson identifies and investigates twelve characteristics of Internet communication that are relevant to these questions and then proceeds with a detailed discussion of what is required of modern private international law rules. Focus is placed on several issues that have far reaching practical consequences in the Internet context including the following: cross border defamation, cross border business contracts, cross border consumer contracts and cross border intellectual property issues. A wide survey of private international law solutions encompasses insightful and timely analyses of relevant laws adopted in a variety of jurisdictions.
