Telegraphic Journal and Monthly Illustrated Review of Electrical Science, 1891 *Popular Science Monthly and World Advance*, 1936 **The Software-defined Vehicle and Its Engineering Evolution** Partha Goswami, 2024-03-06

The automobile is undergoing the biggest transformation of its 100 year history. Motivated by consumer desire for automobiles to integrate with their digital life and inspired by new electric vehicles EVs that routinely receive over the air software updates traditional automakers are embarking on a journey to re-engineer the vehicle as a platform defined by software. The foundation of the shift is a complete redesign from a mechanical hardware centric system to a cloud connected software centric ecosystem where each function is executed via a service oriented architecture. This is the basis of the software defined vehicle SDV. The Software defined Vehicle and its Engineering Evolution: Balancing Issues and Challenges in a New Paradigm of Product Development examines the complex journey ahead for traditional manufacturers as they transition to this new software defined system. The shift will literally impact every facet of the industry from organizational culture, tools and processes to supply chain management, skill development and more. This report covers the state of the industry, explores key facets and challenges of SDVs and provides recommendations as to how to embrace the change. It also considers the balance between vertically and horizontally integrated product development.
