Electric Vehicle Business Models David Beeton, Gereon Meyer, 2014-12-27 This contributed volume collects insights from industry professionals policy makers and researchers on new and profitable business models in the field of electric vehicles EV for the mass market. This book includes approaches that address the optimization of total cost of ownership. Moreover it presents alternative models of ownership financing and leasing. The editors present state of the art insights from international experts including real world case studies. The volume has been edited in the framework of the International Energy Agency's Implementing Agreement for Cooperation on Hybrid and Electric Vehicles IA HEV. The target audience primarily comprises practitioners and decision makers but the book may also be beneficial for research experts and graduate students.

E-Mobility in Europe Walter Leal Filho, Richard Kotter, 2015-04-27 Focusing on technical policy and social societal practices and innovations for electrified transport for personal public and freight purposes this book provides a state of the art overview of developments in e mobility in Europe and the West Coast of the USA. It serves as a learning base for further implementing and commercially developing this field for the benefit of society the environment and public health as well as for economic development and private industry. A fast growing interdisciplinary sector electric mobility links engineering infrastructure environment transport and sustainable development. But despite the relevance of the topic few publications have ever attempted to document or promote the wide range of electric mobility initiatives and projects taking place today. Addressing this need this publication consists of case studies reports on technological developments and examples of successful infrastructure installation in cities which document current initiatives and serve as an inspiration for others.

Organisational Behaviour and Design Alessandra Ricciardelli, Marco Valeri, 2025-04-21 This book focuses on conceptual frameworks debates tools and developments in the fields of organizational behaviour and organizational design. It analyses the concepts related to organizational behaviour such as leadership organizational climate and motivation at one side and focuses on the general framework for organizational design in detail in all its components strategy environment processes people leadership information and knowledge system etc at the other side. The analysis of the psychological factors affecting organizational design also drives to think of possible different configurations of the main components of organizational structure and design that may be a good fit alignment between behaviour and design. In the Industry 4.0 era human resources and personal factors are increasingly central and strategic therefore it is important to understand how psychological factors affect organizational design. It provides a practical guidance on this area of study for developing and implementing the desired organizational architecture. Hence it takes a managerial perspective to identify practices and behaviour resulting in meaningful and satisfying organizational experience vis vis the evolving nature of structures and contexts. The book broadens readers understanding of the role of organizational behavior and design issues in organizational performance while focusing on design changes to remedy organization's core problems. Given these premises it will be of

interest to scholars and professionals in the field of organizational behaviour job design and job crafting strategic management and studies at large who can contribute to organizations evolution towards more harmonious organizational design configurations *Power Systems Operation with 100% Renewable Energy Sources* Sanjeevikumar Padmanaban, Sharmeela Chenniappan, Sivaraman Palanisamy, 2023-10-24 Power Systems Operation with 100% Renewable Energy Sources combines fundamental concepts of renewable energy integration into power systems with real world case studies to bridge the gap between theory and implementation. The book examines the challenges and solutions for renewable energy integration into the transmission and distribution grids and also provides information on design analysis and operation. Starting with an introduction to renewable energy sources and bulk power systems including policies and frameworks for grid upgradation the book then provides forecasting modeling and analysis techniques for renewable energy sources. Subsequent chapters discuss grid code requirements and compliance before presenting a detailed break down of solar and wind integration into power systems. Other topics such as voltage control and optimization power quality enhancement and stability control are also considered. Filled with case studies applications and techniques Power Systems Operation with 100% Renewable Energy Sources is a valuable read to researchers students and engineers working towards more sustainable power systems. Explains Volt Var control and optimization for both transmission grid and distribution. Discusses renewable energy integration into the weak grid system along with its challenges examples and case studies. Offers simulation examples of renewable energy integration studies that readers will perform using advanced simulation tools. Presents recent trends like energy storage systems and demand responses for improving stability and reliability.
