Jones,2018-04-27 This book presents current perspectives on theoretical and empirical issues related to the teaching and
learning of geometry at secondary schools It contains chapters contributing to three main areas A first set of chapters
examines mathematical epistemological and curricular perspectives A second set of chapters presents studies on geometry
instruction and teacher knowledge and a third set of chapters offers studies on geometry thinking and learning Specific
research topics addressed also include teaching practice learning trajectories learning difficulties technological resources
instructional design assessments textbook analyses and teacher education in geometry Geometry remains an essential and
critical topic in school mathematics As they learn geometry students develop essential mathematical thinking and
visualization skills and learn a language that helps them relate to and interact with the physical world Geometry has
traditionally been included as a subject of study in secondary mathematics curricula but it has also featured as a resource in
out of school problem solving and has been connected to various human activities such as sports games and artwork
Furthermore geometry often plays a role in teacher preparation undergraduate mathematics and at the workplace New
technologies including dynamic geometry software computer assisted design software and geometric positioning systems
have provided more resources for teachers to design environments and tasks in which students can learn and use geometry
In this context research on the teaching and learning of geometry will continue to be a key element on the research agendas
of mathematics educators as researchers continue to look for ways to enhance student learning and to understand student
thinking and teachers decision making **McGraw-Hill Education Vocabulary Grades 3-5, Second Edition** Gary Robert
