Bhisham C. Gupta,H. Fred Walker,2007 This book is a desk reference and instructional aid for individuals involved with or
preparing for involvement with Six Sigma project teams As Six Sigma team members Green Belts help select collect data for

methodology The second in a four book series geared specifically for these Green Belt activities this book provides a
thorough discussion of statistical quality control SQC tools These tools are introduced and discussed from the perspective of
application rather than theoretical development From this perspective readers are taught to consider the SQC tools as
statistical alarm bells that send signals when there are one or more problems with a particular process Guidance is also given
on the use of Minitab and JMP in doing these various SQC applications In addition examples and sample problems from all
industries appear throughout the book to aid a Green Belt s comprehension of the material BOOK JACKET **Lawyers Desk**
