Field Guide to Butterflies of South Africa Steve Woodhall, 2012-07-05 Fully revised the new edition of Steve Woodhall's lavishly illustrated Field Guide to Butterflies of South Africa features all of South Africa's 671 butterfly species. This popular field guide now includes 11 new species and incorporates the most recent taxonomic changes based on DNA studies. As with the first edition, the photography is exceptional and a full two thirds of the images in the book are new. An invaluable aid to identification, they show male and female forms where they differ and upper and undersides where possible. The species accounts have been comprehensively updated and expanded, covering identification, habits, flight periods, broods, typical habitat, distribution, and larval food sources. A helpful introductory section discusses butterfly biology, taxonomy, classification, anatomy, and behaviour. Anyone with an interest in the natural world, from lepidopterists and entomologists, both amateur and professional, to students, gardeners, and tourists, will appreciate this beautiful and invaluable guide.
