*TECHNOLOGY MANAGEMENT* Dr. Sanatan Prasad, Dr. Shalini Kumari, 2024-07-10 This book is organized by my Industrial Experience of Tata Steel Growth Shop and Teaching experience of RVS College of Engineering and Technology under Jharkhand University of Technology Ranchi. On and after taken classes of Technology Management of 7th Semester B Tech students I feel that an appropriate book is required for this course and I have planned to write a book. It is indeed a great pleasure and proud privilege for me to publish the first edition of this book entitled Basic of Technology Management. Purpose of this book is to provide a brief guide to the students to fulfill the requirement to cover the course. As far as possible I have tried to present the subject in an easy to read style I have avoided unnecessary fat to the book since students like thin and handy books. From teaching point of view the course offered different major challenges. The field was evolving and there were numerous approaches to deal with the contents with technology new product development or innovations Technology Strategy Strategy Planning and Diffusion of Technology I feel that Technology and Innovations are value drive and management decisions should be anchored in the fundamental objective of creative competitive advantage. I hope this book will serve the requirements of B Tech Engineering Students. Constructive suggestions will be gladly accepted and will be incorporated in the next edition.

*Fusion of Machine Learning Paradigms* Ioannis K. Hatzilygeroudis, George A. Tsirhrintzis, Lakhmi C. Jain, 2023-02-06 This book aims at updating the relevant computer science related research communities including professors researchers scientists engineers and students as well as the general reader from other disciplines on the most recent advances in applications of methods based on Fusing Machine Learning Paradigms. Integrated or Hybrid Machine Learning methodologies combine together two or more Machine Learning approaches achieving higher performance and better efficiency when compared to those of their constituent components and promising major impact in science technology and the society. The book consists of an editorial note and an additional eight chapters and is organized into two parts namely i) Recent Application Areas of Fusion of Machine Learning Paradigms and ii) Applications that can clearly benefit from Fusion of Machine Learning Paradigms. This book is directed toward professors researchers scientists engineers and students in Machine Learning related disciplines as the hybridism presented and the case studies described provide researchers with successful approaches and initiatives to efficiently address complex classification or regression problems. It is also directed toward readers who come from other disciplines including Engineering Medicine or Education Sciences and are interested in becoming versed in some of the most recent Machine Learning based technologies. Extensive lists of bibliographic references at the end of each chapter guide the readers to probe further into the application areas of interest to them.
