American higher education historically and inherently is a morally formative endeavor Yet in order to respond to America's

moral pluralism higher education has increasingly taken a reductionistic approach to moral formation. Consequently it abandoned the effort to supply students with moral expertise. Current approaches help students learn how to be excellent professionals and citizens but they fail to provide the necessary tools for living the good life in college and beyond. *Identity Excellence: A Theory of Moral Expertise for Higher Education* addresses this problem by setting forth a multi disciplinary theory of moral expertise for fostering moral excellence in an array of important identities. To this end it teases apart the essential elements of what it means to be excellent in an identity before discussing the philosophical, sociological, psychological and educational processes necessary for students to internalize traditions of identity excellence as part of their own moral identities. Overall the emergent theory exposes the shortcomings in contemporary general education, professional ethics and co curricular education. Finally this book sets forth a bold but compelling vision for a more hopeful future for American higher education. As outlined within such education involves teaching students excellence in the Great Identities as well as how to prioritize and integrate their pursuit of identity excellence.

Bugeja, 2008 In a seamlessly wired world of television, computers and BlackBerrys where does ethics fit in? To address that question *Living Ethics* calls for a moral convergence to complement the technological one. Identifying principles that apply across media platforms, Michael Bugeja has created a thorough and well researched work that avoids the prescriptive language used by many texts instead he encourages critical thinking through examples that build challenge and enhance readers value systems. While many ethics texts focus almost exclusively on journalistic ethics this award winning text recipient of the 2009 Clifford G Christians Award for Research in Media Ethics emphasizes unifying principles that collapse and transcend the boundaries of a wide variety of media sources including newspapers, magazines, radio, television, public relations, photojournalism, advertising and other forms of traditional and online mass communication. As readers will discover the circumstances of ethical issues may vary but the moral processes used to resolve them are basically the same. Resolutely practical *Living Ethics* is written in a clear and cogent style that helps readers understand unifying principles from historical, philosophical and political perspectives. Grasp the utility of principles that engage audiences and clients while respecting the diverse cultures in an increasingly global media environment. Explore moral convergence through the eyes of more than 100 practitioners at major newsrooms, agencies and organizations. Examine ethical issues visually through more than 20 photos and illustrations. Develop a set of principles to guide their careers across a multitude of platforms.
