Breaking Away Maurice E. Stucke,2022 Breaking Away sounds a warning call alerting readers that their privacy and autonomy

concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous Breaking Away not only articulates the limitations of the current enforcement and regulatory approach but offers concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information

Driverless Cars, Urban

Parking and Land Use Robert A. Simons, 2020-02-05 The subject of driverless and even ownerless cars has the potential to be the most disruptive technology for real estate land use and parking since the invention of the elevator This book includes new research and economic analysis plus a thorough review of the current literature to pose and attempt to answer a number of important questions about the effect that driverless vehicles may have on land use in the United States especially on parking Simons outlines the history of disruptive technologies in transport and real estate before examining how the predicted changes brought in by the adoption of driverless technologies and decline in car ownership will affect our urban areas What could we do with all the parking areas in our cities and our homes and institutional buildings that may no longer be required Can they be sustainably repurposed Will self driving cars become like horses used only by hobbyists for recreation and sport While the focus is on parking the book also contains the views of real estate economists architects and

policymakers and is essential reading for real estate developers and investors transport economists planners politicians and policymakers who need to consider the implications of a future with more driverless vehicles Fasten your seat belt like it or not driverless cars will begin to change the way we move about our cities within ten years **Acts of the General**
