## Visit to the zoo

I recently went on a visit to the zoo, and it was so much fun! I saw all sorts of amazing animals, including lions, giraffes, and monkeys. My favorite part was seeing the elephants, because they were so big and majestic. I also got to see a baby elephant, and it was so cute and playful. I also saw some flamingos, and they were so colorful and graceful. The zoo was a great place to learn about all the different animals and see them up close. I can't wait to go back and see even more amazing creatures.

The Enduring Classroom Larry Cuban, 2023-10-10 A groundbreaking analysis of how teachers actually teach and have taught in the past The quality and effectiveness of teaching are a constant subject of discussion within the profession and among the broader public Most of that conversation focuses on the question of how teachers should teach In The Enduring Classroom veteran teacher and scholar of education Larry Cuban explores different questions ones that just might be more important How have teachers actually taught How do they teach now And what can we learn from both Examining both past and present is crucial Cuban explains If reformers want teachers to adopt new techniques they need to understand what teachers are currently doing if they want to have any hope of having their innovations implemented Cuban takes us into classrooms then and now using observations from contemporary research as well as a rich historical archive of classroom accounts along the way asking larger questions about teacher training and the individual motivations of people in the classroom Do teachers freely choose how to teach or are they driven by their beliefs and values about teaching and learning What role do students play in determining how teachers teach Do teachers teach as they were taught By asking and answering these and other policy questions with the aid of concrete data about actual classroom practices Cuban helps us make a crucial step toward creating reforms that could actually improve instruction
