

# 1 Force Measurement — Student Guide

## 1.1 Observations

These activities are designed for the beginning of a unit about force and motion. Students will be introduced to the concept of force and measuring this measurement with the metric system. These basic skills are essential for students to understand how matter can and can't move. Instructions for the first two experiments need to always be followed for a complete understanding of the concepts of motion and the relationship between the variables of mass and weight.

## 1.2 Procedure

These lessons are designed to provide a key student experience with basic gravitation. Please read the entire procedure and provide time for students to complete the following activities.

Activity 1: Gravity Experimentation in Motion. This experiment provides students with the opportunity to observe the effect of gravity on motion.

Activity 2: Measure the Weight of an Object.

Activity 3: Measure the Mass of an Object.

- Is the object's mass the same on Earth as it is on the Moon?
- Is the object's weight the same on Earth as it is on the Moon?
- Is the object's mass the same on the Moon as it is on Earth?
- How does the mass of an object change if it is cut in half?
- What is the relationship between weight and mass?
