,2006    **Transforming Performance Measurement** Dean Spitzer,2007-02-09 Performance improvement thought leader Dean Spitzer explains why performance measurement should be less about calculations and analysis and more about the crucial social factors that determine how well the measurements get used Transforming Performance Measurement presents a breakthrough approach that will not only significantly reduce those dysfunctions but also promote alignment with business strategy maximize cross enterprise integration and help everyone to work collaboratively to drive value throughout your organization Spitzer s socialization of measurement process focuses on learning and improvement from measurement and on the importance of asking such questions as How well do our measures reflect our business model How successfully are they driving our strategy What should we be measuring and not measuring Are the right people having the right measurement discussions Performance measurement is a dynamic process that calls for an awareness of the balance necessary between seemingly disparate ideas the technical and the social aspects of performance measurement This book gives you assessment tools to gauge where you are now and a roadmap for moving with little or no disruption to a more transformational and mature measurement system The book also provides 34 TMAPs Transformational Measurement Action Plans which suggest both well accepted and emergent measures in areas such as marketing human resources customer service knowledge management productivity information technology research and development costing and more that you can use right away Transforming Performance Measurement tells you not only what to measure but how to do it and in what context to make a truly transformational difference in your enterprise
