*Online Engineering & Internet of Things* Michael E. Auer, Danilo G. Zutin, 2017-09-14 This book discusses online engineering and virtual instrumentation typical working areas for today's engineers and inseparably connected with areas such as Internet of Things cyber physical systems collaborative networks and grids cyber cloud technologies and service architectures to name just a few It presents the outcomes of the 14th International Conference on Remote Engineering and Virtual Instrumentation REV2017 held at Columbia University in New York from 15 to 17 March 2017 The conference addressed fundamentals applications and experiences in the field of online engineering and virtual instrumentation in the light of growing interest in and need for teleworking remote services and collaborative working environments as a result of the globalization of education The book also discusses guidelines for education in university level courses for these topics

Energy Production and Management in the 21st Century III S. Syngellakis, E. Magaril, 2019-01-29 Containing papers from the 3rd International Conference on Energy Production and Management The Quest for Sustainable Energy this book discusses the future creation and use of energy resources It also examines the issue of converting new sustainable sources of energy into useful forms while finding efficient methods of storage and distribution An important objective of the book is discussing ways in which more efficient use can be made of conventional as well as new energy sources This relates to savings in energy consumption reduction of energy losses as well as the implementation of smart devices and the design of intelligent distribution networks This volume provides a comparison of conventional energy sources particularly hydrocarbons with a number of other ways of producing energy emphasising new technological developments based on renewable resources such as solar hydro wind and geothermal In many cases the challenges lie as much with production of such renewable energy at an acceptable cost including damage to the environment as with integration of those resources into the existing infrastructure The changes required to progress from an economy based mainly on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as the development of advanced engineering systems Such progress demands close collaboration between different disciplines in order to arrive at optimum solutions

**The Right Sensory Mix** Diana Derval, 2022-04-08 Many companies fail to acknowledge and analyze disparities observed among customers and simply put them down to culture or emotion New neuroendocrinological research proves that people are rational They just have a different biological perception of the same stimulus Their preferences behavior and decisions are strongly influenced by the hundreds of millions of sensors monitoring their body and brain People with more taste buds are for example sensitive to bitterness and are more likely to drink their coffee with sugar or milk or to drink tea This book helps product managers marketers and corporate decision makers understand and predict customers behavior and preferences It provides the tools to design the right sensory mix color shape depth taste smell texture and sound for each product and fine tune their positioning and range for every local market Using

cases from different sectors the author shows that this approach delivers planet and people friendly innovations which have a higher chance of success in the market **BDEDM 2023** Misra Anuranjan,Ke Yan,Wang Yan,2023-06-13 Proceedings of the 2nd International Conference on Big Data Economy and Digital Management BDEDM 2023 supported by University Malaysia Sabah Malaysia held on 6th 8th January 2023 in Changsha China virtual conference The immediate purpose of this Conference was to bring together experienced as well as young scientists who are interested in working actively on various aspects of Big Data Economy and Digital Management The keynote speeches addressed major theoretical issues current and forthcoming observational data as well as upcoming ideas in both theoretical and observational sectors Keeping in mind the academic exchange first approach the lectures were arranged in such a way that the young researchers had ample scope to interact with the stalwarts who are internationally leading experts in their respective fields of research The major topics covered in the Conference are Big Data in Enterprise Performance Management Enterprise Management Modernization Intelligent Management System Performance Evaluation and Modeling Applications Enterprise Technology Innovation etc
