**Hoodwinked** Mara Einstein, 2025-02-04 Powerhouse marketing expert narrator of Netflix's *Buy Now* documentary shows how today's biggest brands are using cult-like tactics to capture not just your wallet but your devotion. From viral leggings to must-have apps, Dr. Mara Einstein exposes the hidden parallels between cult manipulation and modern marketing strategies. In this eye-opening investigation, drawing from her unique background as both a former MTV marketing executive and a respected media studies professor, she reveals how companies weaponize psychology to transform casual customers into devoted followers. This groundbreaking book uncovers how social media platforms use anxiety-inducing algorithms to keep you trapped in a purchase panic cycle. The secret playbook marketers use to create brand religions around everyday products. Why even the most rational consumers fall prey to scarcity marketing and manufactured FOMO. Practical strategies to break free from manipulative digital marketing tactics. With compelling real-world examples and insights from industry insiders, *Hoodwinked* equips you with the knowledge to recognize and resist these sophisticated manipulation techniques. Dr. Einstein's expertise has been featured in *The New York Times*, *Wall Street Journal*, and *Harvard Business Review*, making her the perfect guide through the maze of modern marketing manipulation. Break free from the cult of consumerism, discover how to make mindful choices in an increasingly manipulative digital marketplace. Easy to read and such a good peek behind the curtain of for-profit companies and the ways they influence and manipulate us. Daniella Young, author of *Uncultured*.

*Revolution in Higher Education* Richard A. DeMillo, 2017-03-03 A report from the front lines of higher education and technology that chronicles efforts to transform teaching, learning, and opportunity. Colleges and universities have become increasingly costly and, except for a handful of highly selective elite institutions, unresponsive to twenty-first-century needs. But for the past few years, technology-fueled innovation has begun to transform higher education, introducing new ways to disseminate knowledge and better ways to learn, all at lower cost. In this impassioned account, Richard DeMillo tells the behind-the-scenes story of these pioneering efforts and offers a roadmap for transforming higher education. Building on his earlier book *Abelard to Apple*, DeMillo argues that the current system of higher education is clearly unsustainable. Colleges and universities are in financial crisis. Tuition rises inexorably. Graduates of reputable schools often fail to learn basic skills and many cannot find suitable jobs. Meanwhile, student loan default rates have soared while the elite Ivy and near-Ivy schools seem remote and irrelevant. Where are the revolutionaries who can save higher education? DeMillo's heroes are a small band of innovators who are bringing the revolution in technology to colleges and universities. DeMillo chronicles, among other things, the invention of MOOCs (Massive Open Online Courses) by professors at Stanford and MIT; Salman Khan's Khan Academy; the use of technology by struggling historically black colleges and universities to make learning more accessible; and the latest research on learning and the brain. He describes the revolution's goals and the entrenched hierarchical system it aims to overthrow and he reframes the nature of the contract between society and its universities. The new institutions of a

**The New Education** Cathy N. Davidson,2017-09-05 A leading educational thinker argues that the American university is stuck in the past and shows how we can revolutionize it for our era of constant change Our current system of higher education dates to the period from 1865 to 1925 It was in those decades that the nation s new universities created grades and departments majors and minors all in an attempt to prepare young people for a world transformed by the telegraph and the Model T As Cathy N Davidson argues in The New Education this approach to education is wholly unsuited to the era of the gig economy From the Ivy League to community colleges she introduces us to innovators who are remaking college for our own time by emphasizing student centered learning that values creativity in the face of change above all The New Education ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come **The**

three potential scenarios the world faces a shock scenario in which there is a global economic crash an Asia over all scenario where the rising economies of Asia completely overtake the West or the American renaissance scenario in which U S politicians unite with each other and with Europe forming a pragmatic third way to bring the West back from the brink of destruction Compelling controversial and thought provoking The War for Wealth alerts readers to the crucial state of the Western economy and shows how leaders can return the West to its position of power in the global arena
