[Description and comparison of offline and online retail environments for cars](#) Irene Anne McLaughlin, 2016-09-26. Essay from the year 2015 in the subject Business economics Trade and Distribution grade 64%. University of Ulster course BSc Business Studies language English abstract. Car retailing is an increasing challenge with the steady decline in the size of dealer networks. Those that continue to operate are looking at ways of improving profitability. The internet has suffered from difficulties in this sector as evidenced by the departure of companies such as Autoquake and Tesco Cars. To compare the offline and online sales of Cars consideration of the potential reach of consumers is required looking at the growth of the internet and potential customer base. Internet usage has grown from 16 million users in 1995 to 3 035 million users in 2014. The use of Smart Phones for web search is growing at an immense rate. In countries such as Africa where Internet coverage is sparse data usage is being pushed by organisations such as Huawei and their 25 mobile phone campaign. This shift will mean that smartphone technology will be the platform of the future in testing purchasing and servicing cars. [Crisis Ahead](#) Edward Segal, 2020-06-11. How many splashy scandals and crisis situations have befallen companies and public figures in the past week alone. How did the organizations and people at the center of those crises manage the situation. Did they survive with their reputations intact or are they facing an ongoing public nightmare that keeps building on itself in the era of social media. This new book from veteran public relations expert Edward Segal is based on the following premise: it's not a matter of IF a scandal or crisis will hit, it's WHEN. How a company deals with it will have lasting impact on their reputation, profits and more. But for most organizations when a crisis hits, they're caught off guard and ill prepared. While essential crisis plans are worthless unless properly executed as the stories and examples featured throughout *Crisis Ahead* attest, Edward Segal's vivid and memorable accounts underscore the benefits of practicing and updating crisis plans at least once a year. The book also provides a template for creating a customizable crisis management plan. *Crisis Ahead* is for CEOs, senior staff, corporate communication professionals, HR and legal teams, boards of directors and front line employees who need to know what to do in the moment, what levers to pull and what moves to make in real time when faced with a crisis, scandal or disaster. This book is written with the need for speed in mind. It's concise and practical with a light touch and occasional humor to help people on the front lines prepare for, survive and bounce back from a crisis. It includes dozens of anecdotes, stories and lessons about how companies, organizations and individuals ranging from

Amazon Apple and the European Union to Disney Starbucks and entrepreneur Elon Musk have prepared for created managed and communicated about crisis situations *An Electric Vehicle Conversion Start-Up. Development of a Business Model Approach* Fabian Hoeft, 2019-10-24 Master s Thesis from the year 2019 in the subject Business economics Business Management Corporate Governance grade 1 3 Niederrhein University of Applied Sciences Krefeld School of Business and Economics language English abstract Today s world of mobility is characterised by a high degree of dynamism and change is becoming apparent Currently around 45 million passenger cars with conventional combustion engines powered by diesel or petrol are registered in Germany The share of electric vehicles is still well below one per cent Nevertheless the voices for sustainable and environmentally friendly transport are becoming louder One political measure in this respect is the implementation of driving bans in major German cities for some conventional combustion cars Car electrification is a solution for converting cars with conventional combustion engines to electric drives In the context of this thesis car electrification is regarded as a transition solution towards a nationwide electrified transport network of new electric cars A comprehensive concept of a business model approach from a start up perspective has been developed based on the analysis of the environment industry and customer needs Analysing the structure of the electrical conversion industry revealed that the subject of car electrification is hardly widespread and that current suppliers have only converted a smaller number of cars Besides the small scale of implementation the operational execution by existing suppliers can be considered weak in terms of competitiveness and sustainability The analysis of the needs of potential customers of car electrification using qualitative and quantitative methods has led to incredibly valuable insights for the development of the business model approach A high openness to purchase was expressed considering some of the factors mentioned such as a test drive with an electrified car before purchase and a durability guarantee of the conversion The high relevance of initial acquisition costs compared to operating expenses in the purchase decision for passenger cars is another precious insight The business model approach developed based on the findings obtained differs fundamentally from the strategies of today s providers By incorporating the existing infrastructure of workshops and service points proximity to the end customer and scalability of the business operation can be achieved Partnering with universities and industry are two critical elements in the development of a sustainable secure and user friendly technical solution *The Economist* ,2007 *The Business Week* ,2007-07 **Build Your Own Electric Vehicle, Third Edition** Seth Leitman, Bob Brant, 2013-02-19 Discusses the benefits of electric vehicles describing each component and including step by step instructions for assembling the parts *Automotive Engineering International* ,2009 **The Toyota Way, Second Edition: 14 Management Principles from the World's Greatest Manufacturer** Jeffrey K.
