**EDUCATION 6.0** KHRITISH SWARGIARY,2026-01-01 As the author of Education 6.0 Envisioning the Symbiotic Future of Learning and Innovation I am profoundly humbled and inspired to present this work at a pivotal moment in human history. We stand on the threshold of an era defined by unprecedented technological convergence where artificial intelligence, quantum computing, bio digital interfaces and regenerative systems are reshaping not only industries but the very essence of how we learn, create and coexist with intelligent machines. Education 6.0 as envisioned in these pages represents a bold, forward looking paradigm that extends beyond the human centric resilience of Education 5.0 and Industry 5.0. It embraces a symbiotic future in which humans and advanced technologies co-evolve ethically, sustainably and equitably to address grand challenges like climate crises, skill obsolescence and global inequities. This book emerges from my deep passion for educational transformation informed by years of research into emerging technologies, pedagogy and policy. Drawing on historical trajectories from ancient gurukuls and hierarchical rote systems to the digital integrations of Education 3.0 and 4.0, I propose Education 6.0 as a holistic framework aligned with the nascent visions of Industry 6.0. Central to this is the original LIKEMS framework: Leadership, Innovation, Knowledge, Skills, Industry, Manufacturing, Maker Centered Practices, Entrepreneurship and Sustainability, designed to cultivate sovereign learners who lead ethical innovation, harness symbiotic intelligence and steward planetary resources. Written amid rapid advancements as of late 2025, this volume synthesizes empirical evidence, real world implementations and speculative yet rational projections to guide educators, policymakers, researchers and innovators. My hope is that it sparks collaborative action toward learning ecosystems where technology amplifies human potential without diminishing agency, empathy or well-being. Education 6.0 is not merely an adaptation to change; it is a call to co-create a harmonious, innovative world for generations to come. KHRITISH SWARGIARY AKA KS Luminar Assam India Jan 2026

**A New Approach to Reading Videogames as Story** Thomas Rowland,2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames: toy games, storybook games, and ludonarratives. This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative. This book explores the idea of storyplaying in connection with new ideas on intromersive movement game mechanics and sacred play to develop a typology of videogames that will enable critics, educators, and theorists to situate videogames within a broad continuum of literary history. Building on this foundation, this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism, the emerging art world of game-mediated photography, the various economies constructed around videogames, the potential of games to serve as third places, and some suggestions for videogames in the classroom. These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces.

with dedicated and important meditation which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises **Journalism and the Metaverse** John V. Pavlik, 2024-06-04 Journalism has been in a state of disruption since the development of the Internet. The Metaverse, what some describe as the future of the Internet, is likely to fuel even further disruption in journalism. Digital platforms and journalism enterprises are already investing substantial resources into the Metaverse or its likely components of augmented reality, virtual reality, and artificial intelligence. Although research shows most of the public has little knowledge of the Metaverse, many are keenly interested in what it or its components may bring. Gartner 2022 predicts that a quarter of the public will spend at least one hour per day in the Metaverse by 2026. Journalism may be an important part of this future. This book will provide a critical examination of the implications of the Metaverse for the continuing transformation of journalism in the digital age. **Reinventing Fashion Retailing** Eirini Bazaki, Vanissa Wanick, 2023-01-01 This book provides a comprehensive overview of digital trends, innovations, and strategies in fashion retailing. As consumers adopt new technologies and ways of shopping, fashion brands are constantly looking for ways to innovate and achieve digital transformation. Combining theory with practice, the authors take a deep dive into the impact of digital technologies on fashion brands' communication and social media strategies, consumer behaviour, and customer participation. Strategies and entrepreneurship and e-tailing strategies. The book covers topics such as Artificial Intelligence, AI, Virtual Reality, VR, Augmented Reality, AR, fashion recommender systems, virtual fitting rooms, customer models, gamification, online shopping, mobile shopping, videogames, digital media, and virtual worlds. The book also explores the concepts of cocreation, storytelling, and interactivity in real life crowdfunding campaigns and in the digital world. Bringing a cutting-edge insight into the state of the fashion business, this book will help scholars and practitioners in fashion retailing discover how to digitalise and gamify products, services, experiences, and open new enterprising avenues through innovative strategies, leadership, and management.
