Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD2022 Summer which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications, and tools of computer and information science, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.

Unveiling Social Dynamics and Community Interaction in the Metaverse Gupta, Brij, 2025-04-16 As the metaverse transforms social dynamics and community interactions, security becomes essential to fostering trust and meaningful engagement in virtual spaces. Protecting users from threats like identity theft, harassment, and misinformation is crucial to maintaining safe and inclusive digital communities. The intersection of security and social interaction influences how people form relationships, collaborate, and express themselves in virtual environments. Strong security frameworks help prevent exploitation while enabling positive social experiences, ensuring that digital communities can thrive without fear of manipulation or harm. By addressing these challenges, metaverse security plays a key role in shaping the future of online socialization and digital citizenship. *Unveiling Social Dynamics and Community Interaction in the Metaverse* explores the intersection of security and social dynamics in the metaverse, examining how digital trust, identity protection, and community safety shape virtual interactions. It provides insights into emerging threats, ethical considerations, and strategies for fostering secure and inclusive virtual environments. Covering topics such as community detection, fake review detection, and affective computing, this book is an excellent resource for cybersecurity professionals, metaverse developers, policymakers, technicians, researchers, professionals, scholars, academicians, and more.
